## Question 1

---

**Question Type:** MultipleChoice

---

The two data centers use the replication technology and the synchronization period. Asynchronous remote replication is used for services with high continuity requirements and important data services.

**Options:**

---

A- True

B- False

**Answer:**

---

B

## Question 2

---

**Question Type:** MultipleChoice

---

In the data center storage and backup scenario, which of the following is the ALL\_IN\_ONE positioning of BCManager services of Huawei DR products?

**Options:**

---

- A- One-dick lest
- B- Data consistency
- C- Template-based policy configuration
- D- Automatic application identification

**Answer:**

---

A

## Question 3

---

**Question Type: MultipleChoice**

---

Which of the following statements about the open protocol of the NDMP for network backup 1\$ Independent of" the platform data storage?

### Options:

---

- A-** The NAS device that supports the NDMP protocol can directly communicate with the backup server without installing the backup software client on the NAS device.
- B-** When the NDMP protocol is used, the backup software, NAS devices, backup media, and production servers must support the NDMP protocol.
- C-** During the backup, the NAS device transfers files and directories related to the backup media to the backup server. The backup server prepares indexes for maintenance.
- D-** Backup data can be read from NAS storage devices and backed up to backup media instead of production servers. This reduces the workload on production servers.

### Answer:

---

A

## Question 4

---

### Question Type: MultipleChoice

---

The Simpanat provide backup, archiving, replication, resource management and distributed search modules. Which of the following statements is incorrect?

**Options:**

---

- A-** The distributed Index technology improves the reliability and performance of the backup system.
- B-** Data classification Indexes are used to classify data files to improve data backup and archiving efficiency.
- C-** Distributed index (also tailed 2-segment Index] indicates that index Information is managed by the management server {CommServe} and media server (MedFaAgent).
- D-** evel-1 indexes are managed and maintained by the media server.

**Answer:**

---

C

## Question 5

---

**Question Type: MultipleChoice**

---

To prevent data loss caused by misoperations, system faults, or other man-middle factor, data of the entire system or a part of critical data is copied from a storage device of the primary computer system to another storage device by using certain method which of the following is not keypoint of a backup system?

**Options:**

---

A- RTO

B- HA

C- BW

D- RPO

**Answer:**

---

B

## Question 6

---

**Question Type:** MultipleChoice

---

After the recovery policy of Huawei DR software BCManager-eReplication is deployed, you must perform the test until the test is passed. In this case, failover r planned migration can be implemented.

**Options:**

---

A- True

B- False

**Answer:**

---

A
