# Question 1

---

## Question Type: MultipleChoice

---

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

From Power Query Editor, you profile the data shown in the following exhibit.

From Power Query Editor, you profile the data shown in the following exhibit

The IoT GUID and IoT ID columns are unique to each row in the query.

You need to analyze IoT events by the hour and day of the year. The solution must improve dataset performance.

Solution: You remove the IoT ID column and retain the IoT GUID column.

Does this meet the goal?

## Options:

---

A) Yes

B) No

## Answer:

---

A

## Question 2

---

### Question Type: DragDrop

---

You are using DAX Studio to query an XMLA endpoint.

You need to identify the duplicate values in a column named Email in a table named Subscription.

How should you complete the DAX expression? To answer, drag the appropriate values to the targets. Each value may be used once, more than once. may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**Answer:**

---

## Question 3

---

**Question Type: MultipleChoice**

---

You plan to modify a Power BI dataset.

You open the Impact analysis panel for the dataset and select Notify contacts.

Which contacts will be notified when you use the Notify contacts feature?

**Options:**

---

- A) any users that accessed a report that uses the dataset within the last 30 days
- B) the workspace admins of any workspace that uses the dataset
- C) the Power BI admins
- D) all the workspace members of any workspace that uses the dataset

**Answer:**

---

D

### **Explanation:**

---

Notify contacts

If you've made a change to a dataset or are thinking about making a change, you might want to contact the relevant users to tell them about it. When you notify contacts, an email is sent to the contact lists of all the impacted workspaces. Your name appears on the email so the contacts can find you and reply back in a new email thread.

## **Question 4**

---

**Question Type:** MultipleChoice

---

You are creating a Power 81 single-page report.

Some users will navigate the report by using a keyboard, and some users will navigate the report by using a screen reader.

You need to ensure that the users can consume content on a report page in a logical order.

What should you configure on the report page?

### Options:

---

- A) the bookmark order
- B) the X position
- C) the layer order
- D) the tab order

### Answer:

---

D

### Explanation:

---

Tab order is the order in which users interact with the items on a page using the keyboard. Generally, we want tab order to be predictable and to closely match the visual order on the page (unless there is a good reason to deviate).

Note: If you are using the keyboard to navigate in a Power BI report, the order in which you arrive at visuals will not follow your vision unless you set the new tab order property. If you have low or no vision, this becomes an even bigger issue because you may not be able to see that you are navigating visuals out of visual order because the screen reader just reads whatever comes next.

## Question 5

---

**Question Type: MultipleChoice**

---

You have an Azure subscription that contains an Azure Synapse Analytics workspace. You create an Azure Data Lake Storage Gen2 account and upload a CSV file named File1.csv. You need to use Synapse Studio to query the data in File1.csv by using a serverless SQL pool. Which Transact-SQL operator should you include in the query?

**Options:**

---

- A) STRIMO\_SPLIT
- B) OPENOUERY
- C) OPCNROWSET
- D) OPEMDATASOURCE

**Answer:**

---

C

## Question 6

---

**Question Type: MultipleChoice**

---

You have a Power BI workspace named Workspacel that contains five dataflows.

You need to configure Workspacel to store the dataflows in an Azure Data Lake Storage Gen2 account

What should you do first?

**Options:**

---

- A) Delete the dataflow queries.
- B) From the Power BI Admin portal, enable tenant-level storage.
- C) Disable load for all dataflow queries.
- D) Change the Data source settings in the dataflow queries.

**Answer:**

---

D

## Question 7

---

**Question Type: MultipleChoice**

---

You have a file named File1.txt that has the following characteristics:

\* A header row

\* Tab delimited values

\* UNIX-style line endings

You need to read File1.txt by using an Azure Synapse Analytics serverless SQL pool.

Which query should you execute?

A)

B)

C)

D)

Image not found or type unknown

### Options:

---

- A) Option A
- B) Option B
- C) Option C
- D) Option D

### Answer:

---

A

## Question 8

---

### Question Type: OrderList

---

You need to create Power BI reports that will display data based on the customers' subscription level.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Image not found or type unknown

**Answer:**

Enable bidirectional filtering.
