Question 1

Question Type: MultipleChoice

Click on the exhibit.

The LSP "toR6" is configured with a fully strict path on an Alcatel-Lucent 7750 SR. Which of the following configurations is required to enable fast reroute for this LSP?

Options:

- A- Enable fast-reroute on all routers along the path. R1, R2, R4, and R6.
- B- Enable both link-protection and node-protection on router R1.
- C- Enable fast-reroute with either one-to-one or facility mode on this LSP
- D- Enable link-protection only on router R4.

Answer:

C

Question 2

Question Type: MultipleChoice

Click on the exhibit. After the lsp-ping command is executed, which of the following best describe the router's action?

Options:

- A- MPLS Echo Request packets are sent within the RSVP-TE tunnel that is signaled for 'lsp-toR2'.

- B-** MPLS Echo Request packets are sent within the LDP tunnel that is signaled for 'lsp-toR2'.
- C-** MPLS Echo Request packets are IP-routed to the destination address of 'lsp-toR2'.
- D-** MPLS Echo Request packets are sent to the destination address of 'lsp-toR2' over TCP.

Answer:

A

Question 3

Question Type: MultipleChoice

Click on the exhibit.

An LDP tunnel is established on R1-R2-R4-R6 because the link between routers R3 and R6 is down. With the LDP-IGP Sync feature enabled, what happens immediately after the link is restored?

Options:

- A- A new LDP session is established on R1-R3-R6 as soon as the FIB is updated.
- B- The LDP session remains unchanged until the existing path R1-R2-R4-R6 goes down.

- C-** A new LDP session is established on R1-R3-R6 as soon as router R1 receives a new label for router R6.
- D-** The LDP session remains unchanged until router R3 stops advertising the maximum metric for the link to router R6.

Answer:

D

Question 4

Question Type: MultipleChoice

Facility fast reroute with node protection is enabled for an LSP, which of the following is FALSE?

Options:

- A-** Each PLR signals a bypass tunnel that avoids the next-hop downstream router.
- B-** When a failure occurs, the PLR pushes an additional label onto the label stack.
- C-** No bypass tunnel is established if the PLR cannot provide node protection.
- D-** The head-end router sets the local protection desired flag in the session attribute object.

Answer:

C

Question 5

Question Type: MultipleChoice

Click on the exhibit.

```
lsp "LSP-toR6"  
  to 10.10.10.6  
  cspf  
  primary "Primary_Path"  
  exit  
  secondary "Secondary_Path-1"  
  exit  
  secondary "Secondary_Path-2"  
  exit  
  secondary "Secondary_Path-3"  
    standby  
    path-preference 10  
  exit  
  secondary "Secondary_Path-4"  
    standby  
    path-preference 20  
  exit  
  no shutdown
```

If the primary path goes down, which secondary LSP path will the head-end router select first?

Options:

A- Secondary_Path-1

B- Secondary_Path-2

C- Secondary_Path-3

D- Secondary_Path-4

Answer:

C

Question 6

Question Type: MultipleChoice

Click on the exhibit.

An LSP path is established on router R1 toward router R6. If there is a problem on router R4, but the link between R2 and R4 remains up, which of the following will affect the failure detection time?

Options:

- A- The time router R2 takes to receive a PATH Error message from router R4.
- B- The time router R2 takes to find out a number of RSVP Hello messages have been missed.
- C- The time router R2 takes to send a PATH Tear message to the head-end router.

D- The time router R2 takes to receive a PATH message from router R4 after a PATH refresh interval.

Answer:

B

Question 7

Question Type: MultipleChoice

Which of the following is NOT required when configuring an LSP with an admin group constraint on an Alcatel-Lucent 7750 SR?

Options:

A- Enable traffic engineering on all routers along the LSP path.

B- Enable CSPF on the head-end router.

C- Configure a path definition on all routers along the LSP path.

D- Enable MPLS and RSVP on all routers along the LSP path.

Answer:

C

Question 8

Question Type: MultipleChoice

To enable the LDP-over-RSVP feature, which of the following configurations is NOT required on an Alcatel-Lucent 7750 SR?

Options:

- A-** Enable the ldp-over-rsvp feature on all PEs and ABRs along the LSP tunnel.
- B-** Configure Link-LDP sessions between each PE-ABR and ABR-ABR pair.
- C-** Configure RSVP-TE LSPs in each area between each PE-ABR and ABR-ABR pair.
- D-** Configure T-LDP sessions with the tunneling option.

Answer:

B
