Question 1

Question Type: MultipleChoice

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company uses a Microsoft Power Platform application.

Employees report that they are unable to open the application.

You need to ensure that the employees can access the application.

Solution: Add the employees to a security group and assign the security group to a Microsoft Teams team.

Does the solution meet the goal?

Options:

A- Yes

B- No

Answer:

A

Question 2

Question Type: Hotspot

A company plans to use Microsoft Power Platform.

The company needs to understand how API requests are used so that its solution can be designed within the API limits granted by Microsoft. The company requires the following information:

- * How API limits are allocated
- * Which Microsoft Power Platform components count toward its API limits
- * Which Power Automate flow steps count toward API limits

You need to describe the API allocation for each design consideration.

Which API allocations should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Design consideration

API allocation

Answer:

How API limits are allocated

- By license
- By app
- By tenant
- By license**
- By environment

Question 3

Question Type: MultipleChoice

Which Microsoft Power Platform components count toward API limits

- Dataverse, Power Apps, and Power Automate
- Dataverse, Power Apps, and Power BI
- Power Apps, Power BI, and Power Pages
- Dataverse, Power Apps, and Power Automate**

You are designing a Microsoft Power Platform solution.

The solution requires Microsoft Power Platform components and custom coding.

Which Power Automate flow steps count toward API limits

- Each step counts as one API request.
- Each step counts as one API request.**
- Each flow run counts as one API request.
- Only successful steps count as one API request.
- Only successful flows count as one API request.

You need to describe the benefits of using Microsoft AppSource.

Which are three benefits of AppSource? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

Options:

- A-** Microsoft Entra ID federated single sign-on (SSO).
- B-** Reduced coding efforts because anyone can publish in AppSource.

C- Microsoft standardized license agreement and privacy policy.

D- App uptime of at least 99.9 percent.

E- Free trial before committing to any additional costs.

Answer:

A, C, E

Question 4

Question Type: Hotspot

You design a Microsoft Power Platform app for a company. The company has the following requirements:

- * need to use an off-the-shelf product by an ISV that provides functionality to enable customers to deposit funds into their account
- * ability to handle a high number of customers depositing funds into their account during lunchtime hours

You need to recommend a solution that meets the requirements. Which components should you recommend?

To answer, select the appropriate options in the answer area.

Answer Area

Requirement

Solution

Answer:

Download compliant ISV solutions.

- AppSource
- Security
- API limits
- AppSource
- ISV Studio

Question 5

Question Type: Hotspot

Verify that the ISV solution will not have issues with high-volume transactions.

- API limits
- Security
- API limits
- AppSource
- ISV Studio

You are a Microsoft Power Platform architect gathering solution requirements for a customer. Management uses three different systems to locate asset inventory and contract details.

Management must view inventory with the ability to select assets and view additional details. Sales representatives have issues locating assets based on specific features in a timely manner when working with customers.

You need to prioritize the requirements.

Which priority should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

	Requirement	Priority
Answer:	Enable sales representatives to locate assets in less time.	Non-functional Time Consumer Non-functional Functional Quick Win

Question 6

Question Type: MultipleChoice

Enable management to view inventory and asset details.

Functional
Big Investment
Non-functional
Budget
Functional

A company plans to import 2.5 million data rows into Microsoft Dataverse during a go-live process. The import job will run as a single import job.

You run a test on the import and observe that some of the rows did not import.

You need to identify which rows did not import.

Which tool should you use?

Options:

A- Azure Event Hub

B- Import Data Wizard

C- Microsoft Power Platform dataflows

D- Azure Service Bus

Answer:

B
