**Answer:**

---

A

# Question 11

---

## Question Type: MultipleChoice

---

You are asked to update and maintain your company's Einstein Analytics dashboards.

A request comes in for one of the dashboards that contains steps from different

datasets. The request is to make it possible for a table from one dataset to be filtered

by the results of a chart from another dataset. Your solution is to create a results

binding.

Which three steps should you implement to create the binding?

### Options:

---

- A- Look up the API name of the filtering field
- B- Look up the API name of the source field
- C- Find source and target step names
- D- Configure the results binding on the target step in the dashboard JSON.

**Answer:**

---

A, C, D
