Question 1

Question Type: MultipleChoice

A SAS administrator has performed the "Clear Projects" action to remove the lock on a SAS Data Integration Studio job called "Create Tables" that some user has checked out in their project repository. What will be the outcome of this action on the user's project repository?

Options:

A) It will become empty and all new and checked out metadata objects will revert to the not checked out state.

B) It will only contain the new metadata objects. All checked out metadata objects will revert to the not checked out state.

C) It will become empty and the Dl job called "Create Tables" will no longer be in a checked out state.

D) It will become empty and will not be accessible until the administrator grants permissions for it to be used again.

Answer:

C

Question 2

Question Type: MultipleChoice

A SAS administrator has performed the "Clear Projects" action to remove the lock on a SAS Data Integration Studio job called "Create Tables" that some user has checked out in their project repository. What will be the outcome of this action on the user's project repository?

Options:

A) It will become empty and all new and checked out metadata objects will revert to the not checked out state.

B) It will only contain the new metadata objects. All checked out metadata objects will revert to the not checked out state.

C) It will become empty and the Dl job called "Create Tables" will no longer be in a checked out state.

D) It will become empty and will not be accessible until the administrator grants permissions for it to be used again.

Answer:

C
