Question 1

Question Type: MultipleChoice

A system administrator repeatedly gets reports of files becoming unexpectedly deleted from a shared storage file system. Which of the following is the system administrator MOST likely to investigate?

Options:

- A- LUN masking
- B- Zoning
- C- User and host authentication
- D- Audit logs

Answer:

D

Question 2

Question Type: MultipleChoice

Which of the following locations would a system engineer MOST likely place a NAS storage device for VM image files?

Options:

- A- In the same subnet as the associated hypervisors
- B- Outside of the external router
- C- In a remote datacenter for geographic diversity
- D- Behind a LUN mask to maximize obfuscation

Answer:

A

Question 3

Question Type: MultipleChoice

An administrator has noticed that a 500MB file is taking over three hours to move over a 10Gbps link. Which of the following is MOST likely responsible for this performance?

Options:

- A- Bandwidth
- B- Compression
- C- Caching
- D- Latency

Answer:

D

Question 4

Question Type: MultipleChoice

An administrator finds and removes an "any any" allow rule. Which of the following is the administrator MOST likely modifying?

Options:

- A- VPN

B- IDS

C- SSH

D- ACL

Answer:

D

Question 5

Question Type: MultipleChoice

A company has two datacenters in different cities. When one of the datacenters loses power, there is near instant failover to the other datacenter. This is an example of which of the following?

Options:

A- Warm site

B- Hot site

C- Offsite storage

D- Backup

Answer:

B

Question 6

Question Type: MultipleChoice

Which of the following is the BEST classification for a hosted IP phone PBX?

Options:

A- BPaaS

B- SaaS

C- XaaS

D- CaaS

Answer:

D

Question 7

Question Type: MultipleChoice

An administrator has logically grouped several VMs and configured settings describing the minimum memory requirement for the group. This is a description of which of the following?

Options:

- A- Resource mapping
- B- Resource pooling
- C- Storage limits
- D- Logical volume manager

Answer:

B

Question 8

Question Type: MultipleChoice

An administrator notices one of the VMs hosting an application server is consuming more CPU resources over time. As a result, the host is running near 90% CPU capacity at peak time. Which of the following is the BEST method to alleviate this issue while minimizing downtime?

Options:

- A- Online storage migration
- B- Online migration to a new host
- C- Upgrade the host CPU to increase resources
- D- Add a new virtual CPU

Answer:

B

Question 9

Question Type: MultipleChoice

A JBOD is being monitored and an administrator notices that a high number of writes occur in short timeframes in the last 24 hours. Which of the following BEST describes this issue?

Options:

- A- I/O bursting
- B- I/O throttling
- C- I/O threshold
- D- I/O saturation

Answer:

A

Question 10

Question Type: MultipleChoice

An administrator is investigating performance issues related to database application response time that is not within the baseline. Which of the following is the symptom of the performance issue?

Options:

A- Aggregation

B- Latency

C- Throttling

D- Bottleneck

Answer:

B

Question 11

Question Type: MultipleChoice

A fault tolerant storage array with clustered nodes is being installed. Which of the following would be the BEST description of this type of array?

Options:

A- Active- Active

B- Passive-Passive

C- Passive-Active

D- Active-Passive

Answer:

A
