## Question 1

---

### Question Type: MultipleChoice

---

A Storage Administrator has an existing single appliance Dell EMC PowerStore 3000T cluster. An additional PowerStore 9000T has been purchased to add into the existing cluster.

How does the administrator proceed?

### Options:

---

- A- Additional VLTi links on the ToR switching must be configured for the 9000T to support the increased inter-switch network load
- B- Add the new 9000T appliance into the cluster per the procedure; mixed models of the same type are supported
- C- Remove two of the four NVMe NVRAM drives from the 9000T the caching configuration of all clustered appliances must match
- D- The new appliance cannot be added to the cluster; appliance model and type must match when clustering appliances together

### Answer:

---

A

## Question 2

---

**Question Type: MultipleChoice**

---

A Storage Administrator needs to address specific fixes within their Dell EMC PowerStore system. Which NDU software upgrade option is used for this situation?

**Options:**

---

- A- Hotfixes
- B- vCenter
- C- Drive firmware
- D- Software releases

**Answer:**

---

B

## Question 3

---

**Question Type: MultipleChoice**

---

Refer to the exhibit.

What is indicated when the circled LED on an expansion enclosure is illuminated amber?

**Options:**

---

- A-** Expansion enclosure faulted
- B-** SAS bus link up
- C-** SAS bus link down
- D-** Expansion enclosure power-on

**Answer:**

---

A

## Question 4

---

**Question Type:** MultipleChoice

---

Which number in the code-naming schema represents a beta distribution?

**Options:**

---

A- 8

B- 6

C- 4

D- 5

**Answer:**

---

C

## Question 5

---

**Question Type:** MultipleChoice

---

What does the command "svc\_journalctl -f -g "st\_io\_monitor"" do?

**Options:**

---

- A- Retrieves log messages from the specified error and watches for re-occurrence
- B- Ignores log messages from the specified error and re-occurring errors
- C- Rotates the log based on the specified error
- D- Deletes all logs before the specified error

**Answer:**

---

A

## Question 6

---

**Question Type: MultipleChoice**

---

While on-site troubleshooting a Dell EMC PowerStore system, the node embedded module fault LED is blinking blue and amber alternating at one second intervals. What does this indicate?

**Options:**

---

- A- Node is in degraded mode
- B- Node is booting
- C- Node is on service mode
- D- System is not initialized

**Answer:**

---

C

## Question 7

---

**Question Type: MultipleChoice**

---

While on-site installing a Dell EMC PowerStore system, the node A and embedded module fault LEDs are alternating blue and amber (blue for 3 seconds). What does this indicate?

**Options:**

---

- A- The system is booting

- B- Nodes are in service mode
- C- The system is not initialized
- D- Nodes are in degraded mode

**Answer:**

---

C

## Question 8

---

**Question Type:** MultipleChoice

---

Which reference source provides service information and FRU procedures for the Dell EMC PowerStore?

**Options:**

---

- A- SolVe Tool
- B- Dell EMC PowerStore Product Page
- C- PowerStore Manager help
- D- DELL EMC Online Support

**Answer:**

---

B

## Question 9

---

**Question Type:** MultipleChoice

---

What is the reason for the best practice of leaving 2 Us of space at the bottom of the rack when racking Dell EMC PowerStore systems?

**Options:**

---

- A- Provide better rack stability
- B- Provide cooling air intake
- C- Leave room for serviceability
- D- Leave clearance for wheel roll

**Answer:**

---

C

## Question 10

---

**Question Type:** MultipleChoice

---

Which type of device is supported in expansion enclosures?

**Options:**

---

- A- NVMe SCM
- B- NVMe SSD
- C- NVMe NVRAM
- D- SAS SSD

**Answer:**

---

D

## Question 11

---

**Question Type:** MultipleChoice

---

Which component can be replaced while the Dell EMC PowerStore is up and running?

**Options:**

---

**A-** 4-Port Mezz card

**B-** SFP

**C-** M.2 Device

**D-** LCC

**Answer:**

---

B
