## Question 1

---

**Question Type:** MultipleChoice

---

SEC2.0 is used for burst packet loss. ()

**Options:**

---

**A-** TRUE

**B-** FALSE

**Answer:**

---

B

## Question 2

---

**Question Type:** MultipleChoice

---

The remote video loopback checks whether video data is transmitted properly on the network to determine whether the remote video module is working correctly.()

**Options:**

---

**A-** TRUE

**B-** FALSE

**Answer:**

---

A

## Question 3

---

**Question Type:** MultipleChoice

---

Relationship between the camera and background, Why the background cannot be multifarious. (Select 2 answers)

**Options:**

---

**A-** The AF function of the camera will focus on areas where the edges have high energy. If the background is multifarious, the camera may focus on the background which makes the foreground become vague.

- B-** the multifarious background consumes large transmission bandwidth, hampering encoding and decoding effect of the foreground
- C-** The AF function of the camera will focus on areas where the edges have high energy. If the background is multifarious, the camera may focus on the foreground which makes the background become vague
- D-** the multifarious background consumes large transmission bandwidth, hampering encoding and decoding effect of the background

**Answer:**

---

A, B

## Question 4

---

**Question Type:** MultipleChoice

---

The system with SEC enabled automatically adjusts error correction strategies for network transmission and video and audio processing using rich QoS modes of IP networks. The packet loss concealment capacity improves more than 60% compared with the industrial level. ( )

**Options:**

---

**A-** TRUE

**B- FALSE**

**Answer:**

---

A

## **Question 5**

---

**Question Type: MultipleChoice**

---

On an H.460 network, H.245 TCP connections are established between private network terminals and theTS.()

**Options:**

---

**A- TRUE**

**B- FALSE**

**Answer:**

---

A

## Question 6

---

**Question Type:** MultipleChoice

---

An SIP response message consists of(). (Select 3 answers)

### Options:

---

- A- response start line
- B- header
- C- message body
- D- request start line

### Answer:

---

A, C, D

## Question 7

---

**Question Type:** MultipleChoice

---

The HD endpoints support the ITU-T G.711, G.722, G.728, AAC-LD (mono-or binaural-audio channel), and HWA-LD audio protocols, showing a strong audio compatibility()

**Options:**

---

**A-** TRUE

**B-** FALSE

**Answer:**

---

A

## Question 8

---

**Question Type:** MultipleChoice

---

( ) signaling is used for master/slave determination.

**Options:**

---

- A- GRQ,GCF
- B- DRQ, DCF
- C- TCSR,TCSA
- D- MS DR, MSDA

**Answer:**

---

D

## Question 9

---

**Question Type:** MultipleChoice

---

In video firewall mode, the ( ) must register with a GK.

**Options:**

---

- A- GE1 port
- B- GE1 or GEO port
- C- FE port

D- GEO port

**Answer:**

---

D

## Question 10

---

**Question Type: MultipleChoice**

---

Methods of improving architecture acoustics contain()- (Select 3 answers)

**Options:**

---

A- get short reverberation time

B- get low background noise

C- get low corridor noises

D- get low expected noises

**Answer:**

---

A, B, C
