Answer:

B, C, D

Question 6

Regarding Huawei's anti-virus technology, which of the following statements is wrong?

Options:

A- The virus detection system cannot directly detect compressed files

B- The anti-virus engine can detect the file type through the file extension

C- Gateway antivirus default file maximum decompression layer is 3 layers

D- The implementation of gateway antivirus is based on proxy scanning and stream scanning

Answer:

B

Question 7

Which of the following options is wrong for the description of the cleaning center?

Options:

A- The cleaning center completes the functions of drainage, cleaning, and re-injection of the flow after cleaning in the abnormal flow.

B- There are two types of drainage methods: static drainage and dynamic drainage.

C- Re-injection methods include: policy route re-injection, static route re-injection, VVPN back-injection and layer 2 same.

D- The cleaning equipment supports rich and flexible attack prevention technologies, but it is ineffective against cc attacks and ICMP Flood attacks.

Answer:

D

Question 8

When the device recognizes a keyword during content filtering detection, which response actions can the device perform? (multiple choice)

Options:

A- Warning

B- Block

C- Declare

D- Operate by weight

Answer:

A, B, D

Question 9

If the Huawei USG600 product uses its own protocol stack cache for all files passing through the device and then performs a virus scan, then the device uses

It is the stream scanning method.

Options:

A- True

B- False

Answer:

B

Question 10

Question Type: **MultipleChoice**

The IPS function of Huawei USG6000 supports two response methods: blocking and alarming.

Options:

A- True

B- False

Answer:

A
