Question 1

What are the following restrictions on cloud server instances manually moved into a scaling group? (Multiple choice)

Options:

A- This instance is the same as the scaling group VPC

B- The instance has been bound to an elastic public IP

C- The scaling group AZ contains the AZ where the instance is located

D- This instance is not used by other scaling groups

Answer:

A, C, D

Question 2

Which of the following security measures does the relational database service have?

A- Use Security Group

B- Use SSL channel

C- Set up a virtual private cloud

D- Bind elastic public network IP

Answer:

A, B, C

Question 3

Question Type: MultipleChoice

What key performance indicators of the relational database service support monitoring database instances and database engines?

Options:

A- Buffer pool utilization

B- Number of database connections

C- TPS

D- QPS

Answer:

A, B, C, D

Question 4

Question Type: **MultipleChoice**

Which of the following aggregation methods does the instance monitoring in the cloud monitoring service support?

Options:

A- average value

B- Standard deviation

C- Max

D- Variance value

Answer:

A, C, D

Question 5

Question Type: MultipleChoice

Which of the following types of attacks can be prevented by the Anti-DDos traffic cleaning service?

Options:

A- SYN Flood attack

B- HTTP Get/Post Flood attack

C- TCP connection exhaustion attack

D- Malformed package

Question 6

Question Type: MultipleChoice

Which of the following are the application scenarios of elastic load balancing? (Multiple choice)

Options:

A- Suitable for web services with large traffic

B- Realize more flexible service forwarding

C- Host a web application or website in a VPC, you can use the VPC like a normal network

D- Provide routing balancing capabilities based on domain names and URLs

Answer:

A, B, C, D

Question 7

Which of the following functions does the Elastic Cloud Server service provide?

Options:

A- Users can create, reinstall and cut virtual machinesChangeOS,switchmachine

B- Users can add and uninstall expansion network cards by themselves, and add EIP, mount and unmount acid disk, apply for keypair, etc.

C- Users can set the elastic cloud server alarm rules

D- Users can view information about their own cloud server resources through the console interface

Answer:

A, B, C, D

Question 8

API What is included in the gateway's multiple security protection?

Options:

A- Threat protection

B- Access security

C- Log audit

D- Authentication service extension

Answer:

A, B, C, D

Question 9

Question Type: **MultipleChoice**

What are the application scenarios of real-time streaming computing service?

A- real-time file transfer

B- Log online analysis

C- Network traffic monitoring

D- Online graph calculation

Answer:

B, C, D

Question 10

Question Type: MultipleChoice

Which service resource indicators can be monitored in cloud monitoring?

Options:

A- Virtual private cloud

B- Distributed Cache Service

C- Elastic load balancing

D- Elastic Computing Service

Answer:

A, B, C, D

Question 11

Question Type: MultipleChoice

Which of the following are typical application scenarios of web application firewalls?

Options:

A- Anti-tampering

B- Key detection latest CVE Loopholes

C- 0Day vulnerability outbreak protection

D- E-commerce snapped up spike protection

Answer:

A, C, D
