---

**Question Type: MultipleChoice**

---

Which of the following is the BEST way for a test team to keep its independence when working in an Agile development environment?

**Options:**

---

- A-** Share the Test Strategy with the Agile development team, but not the details of the Test Cases.
- B-** Locate the team that develops the test automation framework in a different location to the Agile development team.
- C-** Assign testers to be members of the Agile team, but ensure the testers report to a different manager than the developers.
- D-** Co-locate only some of the testers with the Agile development team, while the rest of the testers are in a different location.

**Answer:**

---

C

## Question 6

---

**Question Type:** MultipleChoice

---

What is the definition of agile software development?

**Options:**

---

- A-** Testing carried out informally where no formal test preparation or execution takes place, no recognized test design technique is used and there are no expectations for results.
- B-** A group of software development methodologies based on iterative incremental development with self-organizing cross-functional teams who cooperate to define requirements and to implement the solution.

- C-** A framework to describe the software development lifecycle activities from requirements specification to maintenance where test planning of the various test levels is done as soon as the test basis is ready
- D-** A way of developing software where the test cases are developed, and often automated, before the software under test is developed.

**Answer:**

---

B

## Question 7

---

**Question Type:** MultipleChoice

---

Which of the following is NOT a typical task performed by the tester within an Agile team?
