Question 1

Question Type: MultipleChoice

Which Exchange asset type represents a complete API specification in RAML or OAS format?

Options:

- A- Connectors
- B- REST APIs
- C- API Spec Fragments
- D- SOAP APIs

Answer:

B

Question 2

Question Type: MultipleChoice

Which key DevOps practice and associated Anypoint Platform component should a MuleSoft integration team adopt to improve delivery quality?

Options:

- A- A Continuous design with API Designer
- B- Automated testing with MUnit
- C- Passive monitoring with Anypoint Monitoring
- D- Manual testing with Anypoint Studio

Answer:

B

Question 3

Question Type: MultipleChoice

What are two reasons why a typical MuleSoft customer favors a MuleSoft-hosted Anypoint Platform runtime plane over a customer-hosted runtime for its Mule application deployments? (Choose two.)

Options:

- A- Reduced application latency
- B- Increased application isolation
- C- Reduced time-to-market for the first application
- D- Increased application throughput
- E- Reduced IT operations effort

Answer:

C, E

Question 4

Question Type: MultipleChoice

According to the Internet Engineering Task Force (IETF), which supporting protocol does File Transfer Protocol (FTP) use for reliable communication?

Options:

- A- A Secure Sockets Layer (SSL)
- B- B Transmission Control Protocol (TCP)
- C- Lightweight Directory Access Protocol (LDAP)
- D- Hypertext Transfer Protocol (HTTP)

Answer:

B

Question 5

Question Type: MultipleChoice

Which productivity advantage does Anypoint Platform have to both implement and manage an AP?

Options:

- A- Automatic API proxy generation
- B- Automatic API specification generation
- C- Automatic API semantic versioning

D- Automatic API governance

Answer:

D

Question 6

Question Type: MultipleChoice

A team has completed the build and test activities for a Mule application that implements a System API for its application network.

Which Anypoint Platform component should the team now use to both deploy and monitor the System AP\ implementation?

Options:

A- API Manager

B- Design Center

C- Anypoint Exchange

D- Runtime Manager

Answer:

D

Question 7

Question Type: MultipleChoice

What is an advantage that Anypoint Platform offers by providing universal API management and Integration-Platform-as-a-Service (iPaaS) capabilities in a unified platform?

Options:

- A- Ability to use a single iPaaS to manage and integrate all API gateways
- B- Ability to use a single connector to manage and integrate all APIs
- C- Ability to use a single control plane for both full-lifecycle API management and integration
- D- Ability to use a single iPaaS to manage all API developer portals

Answer:

C

Explanation:

Anypoint Platform offers universal API management and Integration-Platform-as-a-Service (iPaaS) capabilities in a unified platform, meaning that it provides a single control plane to manage both full-lifecycle API management and integration. This allows organizations to easily manage their APIs and integrations, as well as deploy APIs and integrations quickly and efficiently. According to the MuleSoft Certified Integration Architect - Level 1 Course Book, "Anypoint Platform provides a unified platform for managing, deploying, and monitoring both API and integration solutions, allowing organizations to quickly and easily build and manage their APIs and integrations."

Question 8

Question Type: MultipleChoice

According to MuleSoft's recommended REST conventions, which HTTP method should an API use to specify how API clients can request data from a specified resource?

Options:

A- POST

B- PUT

C- PATCH

D- GET

Answer:

D

Question 9

Question Type: MultipleChoice

According to MuleSoft, which major benefit does a Center for Enablement (C4E) provide for an enterprise and its lines of business?

Options:

A- Enabling Edge security between the lines of business and public devices

B- Centralizing project management across the lines of business

C- Centrally managing return on investment (ROI) reporting from lines of business to leadership

D- Accelerating self-service by the lines of business

Answer:

B

Question 10

Question Type: MultipleChoice

According to MuleSoft's IT delivery and operating model, which approach can an organization adopt in order to reduce the frequency of IT project delivery failures?

Options:

- A- Decouple central IT projects from the innovation that happens within each line of business
- B- Adopt an enterprise data model
- C- Prevent technology sprawl by reducing production of API assets
- D- Stop scope creep by centralizing requirements-gathering

Answer:

A

Question 11

Question Type: MultipleChoice

What is an example of data confidentiality?

Options:

- A- Signing a file digitally and sending it using a file transfer mechanism
- B- Encrypting a file containing personally identifiable information (PI)
- C- Providing a server's private key to a client for secure decryption of data during a two-way SSL handshake
- D- De-masking a person's Social Security number while inserting it into a database

Answer:

B
