Question 1

Question Type: MultipleChoice

You are using the Microsoft Power Apps maker portal to begin deployment of a solution. You are preparing for deployment of updates from a test environment to production.

You need to deploy the solution.

Which three actions should you perform? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

Options:

- A- Set the solution version.
- B- Create the environment
- C- Delete the solution.
- D- Apply the solution upgrade.
- E- Import the solution.

Answer:

A, D, E

Question 2

Question Type: MultipleChoice

You are developing a power Automate desktop flow to process documentation. The flow has a variable bank account numbers.

Users are able to view bank account number while the flow is tested.

You need to ensure the bank account number are not visible in the flow.

What should you do?

Options:

- A-** Mark variables produced as disabled.
- B-** Mark the variable as sensitive.
- C-** Turn on Secure input in a cloud flow.
- D-** Change the external name.

Answer:

C

Question 3

Question Type: MultipleChoice

You have an automation solution that uses a desktop flow. The flow reads data from a file that is stored on UserA's machine and writes data to an application. You import the solution to an environment that is connected to UserA's machine.

UserB report that the flow fails. An alert indicated that the path to thee the file does not exist. You conform that the file is present on userB's desktop.

You need to resolve the issue.

What should UserB Do?

Options:

- A-** Delete and recreate the file.
- B-** Change access rights for the file to allow read operations for the PAD process.
- C-** Change the location of the file to a specific path that is not dependent on the signed-in user.
- D-** Modify the action to retry if the process cannot find the file.

Answer:

C

Question 4

Question Type: MultipleChoice

You have an automation solution that uses a desktop flow. The flow reads data from a file that is stored on a user's machine and writes the data to an application. You import the solution to an environment that is connected to another user's machine.

The user reports that the flow fails. An alert indicates that the path to a file does not exist. You confirm that the file present on the user's desktop.

You need to resolve the issue.

What should you do?

Options:

A- Use the Get Windows environment variable action to read the USERNAME environment variable and use the value in the path to the user's desktop.

B- Change access rights for the file to allow read operations for the PAD process.

C- Move the file to the user's OneDrive storage.

D- Change the access rights for the file to allow read operations for the current user.

Answer:

B

Question 5

Question Type: MultipleChoice

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are developing a solution for a medical practice. The solution must use an artificial intelligence (AI) model to evaluate medical X-ray images and detect broken bones.

You need to create the AI model for the solution.

Solution: Use AI Builder to create the model.

Does the solution meet the goal?

Options:

A- Yes

B- No

Answer:

B

Question 6

Question Type: MultipleChoice

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating a cloud flow that will use two Update Row actions to interact with Microsoft Dataverse. Neither of these actions are dependent on each other.

You must minimize the amount of processing time require to complete the flow.

You need to implement the actions in the cloud flow.

Solution: Create a parallel branch for the two Update Row actions.

Does the solution meet the goal?

Options:

A- Yes

B- No

Answer:

A

Question 7

Question Type: MultipleChoice

You are developing a desktop flow.

You need to include an IF statement that contains AND logic within the flow.

Which expression should you use for the IF statement?

A)

```
IF $''%IsEmpty(Variable1)% AND %IsEmpty(Variable2)%'' = $''True''
```

B)

```
IF IsEmpty(IsEmpty(Variable1) AND IsEmpty(Variable2))
```

C)

```
IF IsEmpty(Variable1 AND Variable2)
```

D)

```
IF (IsEmpty(Variable1) OR IsEmpty(Variable2)) = $''True''
```

E)

```
IF (IsEmpty(Variable1) AND IsEmpty(Variable2)) = $''True''
```

Options:

A- Option A

B- Option B

C- Option C

D- Option D

Answer:

C

Question 8

Question Type: MultipleChoice

You develop a Microsoft Power Platform solution for a client.

You must test the solution in a user acceptance testing (UAT) environment before deploying the solution to production. You must ensure that the configurations for the UAT and production environments are identical. You must minimize administrative effort.

You need to ensure that the environments are identical.

Which Microsoft Power Platform feature should you use?

Options:

- A- Copy environment
- B- Edit environment properties
- C- Move environment
- D- Reset environment
- E- Restore environment

Answer:

A

Question 9

Question Type: MultipleChoice

You are preparing to share a desktop flow. You need to share the flow with another user.

Which two methods can you use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

Options:

- A- Share the desktop flow by using the Microsoft Power Platform admin center.
- B- Share the desktop flow by using the Power Automate portal. Grant the user permissions to access the flow.
- C- Export a solution that contains the desktop flow and provide the solution to the user.
- D- Create a managed solution that contains the desktop flow and share the solution with another user.

Answer:

B, C

Question 10

Question Type: MultipleChoice

You are creating a solution that will use a Choice field for approvals.

You need to ensure that other users can use the Choice field with their Microsoft Dataverse tables.

What should you use?

Options:

A- Environment variable

B- Local choice

C- Global choice

Answer:

C

Question 11

Question Type: MultipleChoice

You are creating a solution that will use a Choice field for approvals.

You need to ensure that other users can use the Choice field with their Microsoft Dataverse tables.

What should you use?

Options:

- A- Environment variable
- B- Local choice
- C- Global choice

Answer:

C

Question 12

Question Type: MultipleChoice

You create a variable named NewVar as shown in the configuration screen below.

Set variable

{x} Set the value of a new or existing variable, create a new variable or overwrite a previously created variable [More info](#)

Set: **NewVar** {x}

To: `https://contoso.sharepoint.com/Microsoft/PP/Shared%20Documents/Forms/AllItems.aspx` {x}

Syntax error.

Save

Cancel

You attempt to set the value of NewVar to the following URL:

```
https://contoso.sharepoint.com/Microsoft/PP/Shared%20Documents/Forms/AllItems.aspx
```

The Set variable page alerts you that there is a syntax error. You need to resolve the issue. What should you do?

Options:

- A- Escape the percent sign (%) with a back slash (\%).
- B- Replace the percent sign (%) with two percent signs (%%).
- C- Replace the forward slash characters (/) with two forward slash characters (//).
- D- Escape the forward slash characters (/) with a back slash (\).

Answer:

B
