Question 1

Question Type: MultipleChoice

An administrator recently executed maintenance on their network. After they would like to verify that this maintenance window did not have any adverse effects on their Nutanix Cluster by running Nutanix Cluster Check (NCC)

Which two interface can be used to run NCC? (Choose two)

Options:

A- REST API
B- PowerShell
C- Prism
D- CLI
E- IPMI

Answer:

C, D

Question 2

Question Type: MultipleChoice

An administrator needs to shut down and relocate a Nutanix cluster.

Which step should the administrator take after shutting down all guest VMs on the cluster?

Options:

A- Change the node and CVM IP addresses if necessary
B- Execute the command: cluster stop on a CVM
C- Put each host into maintenance mode
D- Execute the command: cluster restart_genesis on a CVM

Answer:

B

Question 3

Question Type: MultipleChoice

In which two scenarios is Nutanix Key Management Server supported?

Options:

A- XenServer and AHV mixed cluster
B- KVM and AHV mixed cluster
C- Data-at-Rest Encryption
D- Cluster's local KMS.

Answer:

A, B

Question 4

Question Type: MultipleChoice

to build the vm on the ahv cluster, after amigration, what ''Add Disk'' operation(s) can be used? (Choose two)

Options:

A- clone from ADSF file
B- clone from storagepool
C- clone from image service
D- clone from vm list

Answer:

A, C

Question 5

Question Type: MultipleChoice

An administrator needs to power down an AHV node in order to replace a failed DIMM?

Which step should the administrator take after placing the node into maintenance mode?

Options:

A- Execute the command cluster status
B- Power of the node
C- Shut Down the nutanix CVM
D- Reboot the Nutanix CVM

Answer:

C

Question 6

Question Type: MultipleChoice

Which command should an administrator run from the CLI to view the uplink state of all AHV nodes in the cluster?

Options:

A- allssh show_uplinks
B- manage_ovs show_uplinks
C- allssh manage_ovs show_uplinks
D- manage ovs show uplinks

Answer:

C

Question 7

Question Type: MultipleChoice

what additional features are available with prism pro(prism central with pro license)? (Choose two)

Options:

A- centralized upgrades
B- VM right-sizing
C- vm tagging

Answer:

A, B

Question 8

Question Type: MultipleChoice

what information is shared through pulse? multi answer

Options:

A- system level statistics
B- metadata
C- identification data
D- system alerts

Answer:

A, D

Question 9

Question Type: MultipleChoice

A node has two SSDs in Slot0 and Slot 1. The SSD in Slot 1 fails.

What is the result?

Options:

A- The CVM reboots. Other running VMs do not reboot, and the SSD capacity is reduced.
B- The CVM and other running VMs do not reboot, and the SSD capacity is reduced.
C- The CVM is down. AHV takes over serving storage to the node, and the SSD capacity is reduced.

D- The CVM is down. Another CVM takes over serving storage to the node, and the SSD capacity is reduced.

Answer:

B

Explanation:

With 2 SSD's, if slot 0 fails the Cvm reboots and will recover using slot1, vm rights/reads flow to other nodes while Cvm is restarting. If slot 1 fails, no Cvm reboot occurs but SSD capacity is reduced, missing blocks are retrieved from other nodes as needed and re protected. If both SSD's fail, the Cvm is down and all read/writes are done to other nodes.

Question 10

Question Type: MultipleChoice

An administrator needs to take a single node down for maintenance. Which two steps should the administrator take? (Choose two)

Options:

A- Make sure Auto Evacuation is enabled
B- Shut down or live migrate all VMs off of the node.
C- Verify the data resiliency status of the cluster.
D- Reclaim the licenses to the Nutanix Support Portal.

Answer:

B, C

Explanation:

https://portal.nutanix.com/page/documents/details/?targetId=AHV-Admin-Guide-v51:AHV-Admin-Guide-v51

Question 11

Question Type: MultipleChoice

An administrator wants to make sure that the health of a cluster is in a good state.

Which command the utility will provide information related to the health of the cluster?

Options:

A- ncc
B- generic status
C- top
D- iostat

Answer:

A

Question 12

Question Type: MultipleChoice

Which two methods are valid for migrating a VM from a Nutanix vSphere cluster to AHV? (Choose two.)

Options:

A- Storage vMotion
B- Live Migration
C- Nutanix Move
D- Cross-Hypervisor DR

Answer:

C, D

Explanation:

https://hyperhci.com/2019/08/29/cross-hypervisor-migration-to-from-nutanix-ahv/
