Question 1

Question Type: MultipleChoice

Default port numbers for an LDAP server is _____ for standard connections and _____ SSL connections.

Options:

A- 675, 389

B- 389, 636

C- 636, 290

D- 290, 675

Answer:

B

Explanation:

A client starts an LDAP session by connecting to an LDAP server, called a Directory System Agent (DSA), by default on TCP and UDP port 389, or on port 636 for LDAPS. Global Catalog is available by default on ports 3268, and 3269 for LDAPS.

Question 6

Question Type: MultipleChoice

Which tool is used to enable ClusterXL?

Options:

- A- SmartUpdate
- B- cpconfig
- C- SmartConsole
- D- sysconfig

Answer:

B

Question 7

Question Type: MultipleChoice

You are going to perform a major upgrade. Which back up solution should you use to ensure your database can be restored on that device?

Options:

A- backup

B- logswitch

C- Database Revision

D- snapshot

Answer:

D

Explanation:

The snapshot creates a binary image of the entire root (lv_current) disk partition. This includes Check Point products, configuration, and operating system.

Starting in R77.10, exporting an image from one machine and importing that image on another machine of the same type is supported.

The log partition is not included in the snapshot. Therefore, any locally stored FireWall logs will not be saved.
