# Question 1

Drag and drop the steps to restore an automatic device registration failure on the standby Cisco FMC from the left into the correct order on the right. Not all options are used.

| | |
|---|---|
| Enter the "configure manager add" command at the CLI of the affected device. . | Step 1 |
| Unregister the device from the standby Cisco FMC. | Step 2 |

**Answer:**

| | |
|---|---|
| Register the affected device on the active Cisco FMC. | Step 3 |
| Enter the "configure manager delete" command at the CLI of the affected device. | Step 4 |

# Question 2

Register the affected device on the standby Cisco FMC.

Unregister the device from the active Cisco FMC.

An engineer is attempting to create a new dashboard within the Cisco FMC to have a single view with widgets from many of the other dashboards. The goal is to have a mixture of threat and security related widgets along with Cisco Firepower device health information Which two widgets must be configured to provide this information? (Choose two.)

**A)** Intrusion Events

**B)** Correlation Information

**C)** Appliance Status

**D)** Current Sessions

**E)** Network Compliance

**Answer:**

A, B

# Question 3

**Question Type:** **MultipleChoice**

An engineer configures an access control rule that deploys file policy configurations to security zones, and it cause the device to restart. What is the reason for the restart?

**Options:**

**A)** Source or destination security zones in the access control rule matches the security zones that are associated with interfaces on the target devices.

**B)** The source tunnel zone in the rule does not match a tunnel zone that is assigned to a tunnel rule in the destination policy.

**C)** Source or destination security zones in the source tunnel zone do not match the security zones that are associated with interfaces on the target devices.

**D)** The source tunnel zone in the rule does not match a tunnel zone that is assigned to a tunnel rule in the source policy.

## Answer:

A

# Question 4

**Question Type: MultipleChoice**

An engineer is attempting to create a new dashboard within the Cisco FMC to have a single view with widgets

from many of the other dashboards. The goal is to have a mixture of threat and security related widgets along

with Cisco Firepower device health information. Which two widgets must be configured to provide this

information? (Choose two.)

**Options:**

**A)** Intrusion Events

**B)** Correlation Information

**C)** Appliance Status

**D)** Current Sessions

**E)** Network Compliance

**Answer:**

A, C

**Explanation:**

https://www.cisco.com/c/en/us/td/docs/security/firepower/640/configuration/guide/fpmc-config-guide-v64/

dashboards.html#ID-2206-00000283

# Question 5

**Question Type:** **MultipleChoice**

An engineer configures an access control rule that deploys file policy configurations to security zone or tunnel zones, and it causes the device to restart. What is the reason for the restart?

## Options:

**A)** Source or destination security zones in the access control rule matches the security zones that are associated with interfaces on the target devices.

**B)** The source tunnel zone in the rule does not match a tunnel zone that is assigned to a tunnel rule in the destination policy.

**C)** Source or destination security zones in the source tunnel zone do not match the security zones that are associated with interfaces on the target devices.

**D)** The source tunnel zone in the rule does not match a tunnel zone that is assigned to a tunnel rule in the source policy.

## Answer:

A

## Explanation:

https://www.cisco.com/c/en/us/td/docs/security/firepower/623/configuration/guide/fpmc-config-guide-v623/policy_management.html

# Question 6

In a multi-tenant deployment where multiple domains are in use. which update should be applied outside of the Global Domain?

## Options:

**A)** minor upgrade

**B)** local import of intrusion rules

**C)** Cisco Geolocation Database

**D)** local import of major upgrade

## Answer:

C

# Question 7

An organization has a compliancy requirement to protect servers from clients, however, the clients and servers all reside on the same Layer 3 network Without readdressing IP subnets for clients or servers, how is segmentation achieved"?

## Options:

**A)** Deploy a firewall in transparent mode between the clients and servers.

**B)** Change the IP addresses of the clients, while remaining on the same subnet.

**C)** Deploy a firewall in routed mode between the clients and servers

**D)** Change the IP addresses of the servers, while remaining on the same subnet

## Answer:

C

# Question 8

**Question Type: MultipleChoice**

An organization has implemented Cisco Firepower without IPS capabilities and now wants to enable inspection

for their traffic. They need to be able to detect protocol anomalies and utilize the Snort rule sets to detect

malicious behavior. How is this accomplished?

## Options:

**A)** Modify the network discovery policy to detect new hosts to inspect.

**B)** Modify the access control policy to redirect interesting traffic to the engine.

**C)** Modify the intrusion policy to determine the minimum severity of an event to inspect.

**D)** Modify the network analysis policy to process the packets for inspection.

## Answer:

D

## Explanation:

https://www.cisco.com/c/en/us/td/docs/security/firepower/670/fdm/fptd-fdm-config-guide-670/fptd-fdmintrusion.

# Question 9

An engineer configures an access control rule that deploys file policy configurations to security zones, and it cause the device to restart. What is the reason for the restart?

## Options:

**A)** Source or destination security zones in the access control rule matches the security zones that are associated with interfaces on the target devices.

**B)** The source tunnel zone in the rule does not match a tunnel zone that is assigned to a tunnel rule in the destination policy.

**C)** Source or destination security zones in the source tunnel zone do not match the security zones that are associated with interfaces on the target devices.

**D)** The source tunnel zone in the rule does not match a tunnel zone that is assigned to a tunnel rule in the source policy.

## Answer:

A

# Question 10

In a multi-tenant deployment where multiple domains are in use. which update should be applied outside of the Global Domain?

## Options:

**A)** minor upgrade

**B)** local import of intrusion rules

**C)** Cisco Geolocation Database

**D)** local import of major upgrade

## Answer:

C

# Question 11

**Question Type: DragDrop**

Drag and drop the steps to restore an automatic device registration failure on the standby Cisco FMC from the left into the correct order on the right. Not all options are used.

| | |
|---|---|
| Enter the "configure manager add" command at the CLI of the affected device. | Step 1 |
| Unregister the device from the standby Cisco FMC. | Step 2 |

| | |
|---|---|
| Register the affected device on the active Cisco FMC. | Step 3 |
| Enter the "configure manager delete" command at the CLI of the affected device. | Step 4 |

# Question 12

**Question Type: MultipleChoice**

Register the affected device on the standby Cisco FMC.

Unregister the device from the active Cisco FMC.

An engineer is attempting to create a new dashboard within the Cisco FMC to have a single view with widgets from many of the other dashboards. The goal is to have a mixture of threat and security related widgets along with Cisco Firepower device health information. Which two widgets must be configured to provide this information? (Choose two.)

## Options:

**A)** Intrusion Events

**B)** Correlation Information

**C)** Appliance Status

**D)** Current Sessions

**E)** Network Compliance

## Answer:

A, B
