Question 1

Question Type: MultipleChoice

An administrator has video devices and an Expressway infrastructure with the SIP domain of cisco.com. A cluster of Cisco Meeting Servers is added to the network for conferencing purposes to utilize a SIP domain of spaces.cisco.com, and calls must be routed from the endpoints to meetings on the server. What should be configured to accomplish this goal?

Options:

- A- outbound call rule on Cisco Meeting Server that matches @spaces.cisco.com and targets spaces
- B- incoming call rule in Cisco Meeting Server that matches @cisco.com and targets the SIP trunk to Expressway-C
- C- search rule on Expressway-C that sends calls for @spaces.cisco.com to the Cisco Meeting Server neighbor zone
- D- search rule on Expressway-E that sends calls for @cisco.com to the DNS zone

Answer:

C

Question 2

Question Type: MultipleChoice

Refer to the exhibit.

Warning	The CDR receiver address is not specified and cannot be added as a CDR receiver to cms1.pod1.local
Warning	The CDR receiver address is not specified and cannot be added as a CDR receiver to cms2.pod1.local

Which action resolves the Cisco Meeting Server warnings?

Options:

- A-** Add Cisco Meeting Server by both IPv6 and IPv4 addresses to have Cisco Meeting Management set itself as a receiver.
- B-** Configure the CDR receiver address in the Cisco Meeting Management settings.
- C-** Set the CDR receiver as an IP address and not as an FQDN.
- D-** Change the Cisco Meeting Server permissions in Cisco Meeting Management to allow Cisco Meeting Management to set itself as a receiver.

Answer:

B

Question 3

Question Type: MultipleChoice
