Options:

- A- hybrid cloud
- B- private cloud
- C- community cloud
- D- public cloud

Answer:

C

Question 4

Question Type: MultipleChoice

Which VPN provides scalability for organizations with many remote sites?

Options:

- A- DMVPN

- B- site-to-site IPsec
- C- SSL VPN
- D- GRE over IPsec

Answer:

A

Question 5

Question Type: MultipleChoice

Which Cisco network security device supports contextual awareness?

Options:

- A- Firepower
- B- CISCO ASA
- C- Cisco IOS
- D- ISE

Answer:

D

Question 6

Question Type: MultipleChoice

Which solution is more secure than the traditional use of a username and password and encompasses at least two of the methods of authentication?

Options:

- A- single-sign on
- B- RADIUS/LDAP authentication
- C- Kerberos security solution
- D- multifactor authentication

Answer:

D

Question 7

Question Type: MultipleChoice

An organization is using DNS services for their network and want to help improve the security of the DNS infrastructure. Which action accomplishes this task?

Options:

- A- Use DNSSEC between the endpoints and Cisco Umbrella DNS servers.
- B- Modify the Cisco Umbrella configuration to pass queries only to non-DNSSEC capable zones.
- C- Integrate Cisco Umbrella with Cisco CloudLock to ensure that DNSSEC is functional.
- D- Configure Cisco Umbrella and use DNSSEC for domain authentication to authoritative servers.

Answer:

D

Question 8

Question Type: MultipleChoice

What is the purpose of the Cisco Endpoint IoC feature?

Options:

- A- It is an incident response tool.
- B- It provides stealth threat prevention.
- C- It is a signature-based engine.
- D- It provides precompromise detection.

Answer:

A

Explanation:

The Endpoint Indication of Compromise (IOC) feature is a powerful incident response tool for scanning of post-compromise indicators across multiple computers.

Question 9

Question Type: MultipleChoice
