Question 1

Question Type: MultipleChoice

Which method is used to avoid toll fraud with Cisco Unified Communications Manager calls?

Options:

- A) Call policy service
- B) Default zone access rules
- C) TOLLFRAUD_APP
- D) class of service

Answer:

D

Question 2

Question Type: MultipleChoice

Which wildcard must an engineer configure to match a whole domain in SIP route patterns?

Options:

- A) *
- B) @
- C) .
- D) !

Answer:

A

Explanation:

There is no @ for a wildcard in SIP route patterns. Because no default SIP route patterns exist in Cisco Unified Communications Manager, you must set them up. Domain name examples are cisco.com, my-pc.cisco.com, *.com, rtp-ccm[1-5].cisco.com. Valid characters for domain names are [, -, ., 0-9, A-Z, a-z, *, and]. IPv4 address examples 172.18.201.119 or 172.18.201.119/32 (explicit IP host address); 172.18.0.0/16 (IPsubnet); 172.18.201.18/21 (IP subnet). Valid characters for IP addresses: 0-9, ., and /

Question 3

Question Type: MultipleChoice

Which action prevent toll fraud in Cisco Unified Communications Manager?

Options:

- A) Configure ad hoc conference restriction.
- B) Implement toll fraud restriction in the Cisco IOS router.
- C) Allow off-net to off-net transfers.
- D) Implement route patterns in Cisco Unified CM.

Answer:

A

Question 4

Question Type: MultipleChoice

Which issue cause slips on a PRI?

Options:

- A) incorrectly configured time zone.
- B) incorrectly encapsulation
- C) incorrect clock source
- D) change in the line code

Answer:

C

Question 5

Question Type: MultipleChoice

What is the major difference between the two possible Cisco IM and presence high-availability modes?

Options:

- A) Balanced mode provides user load balancing and user failover only for manually generated failovers. Active/standby mode provides an unconfigured standby node in the event of an outage, but it does not provide load balancing.
- B) Balanced mode provides user load balancing and user failover in the event of an outage. Active/standby mode provides an always on standby node in the event of an outage, but it does not provide load balancing.
- C) Balanced mode does not provide user load balancing, but it provides user failover in the event of an outage. Active/standby mode provides an always on standby node in the event of an outage, but it does not provide load balancing.
- D) Balanced mode provides user load failover in the event of an outage. Active/standby mode provides an always on standby node in the event of an outage, and it also provides load balancing.

Answer:

B

Question 6

Question Type: MultipleChoice

Refer to the exhibit.

The translation rule is configured on the voice gateway to translate DNIS. What is the outcome if the gateway receives 0255-343-1234 as DNIS?

Options:

- A) The translation rule is not matched because DNIS does not end with a "\$".
- B) The translation rule is matched and the translated number is 02553431234.
- C) The translation rule is not matched because DNIS contains "-".
- D) The translation rule is matched and the translated number is 025553431234.

Answer:

B

Question 7

Question Type: MultipleChoice

A DTMF mismatch is occurring between an MGCP gateway registered FXS port and a Cisco Unified communications Manager SIP trunk. Which media resource can be leveraged to interwork this mismatch?

Options:

- A) Media Termination point
- B) Conference Bridge
- C) Annunciator
- D) Trusted relay point

Answer:

A

Question 8

Question Type: MultipleChoice

Which protocol does prime collaboration Assurance use to poll the health status of different systems in the collaboration environment?

Options:

- A) SIP
- B) SMTP
- C) SCCP
- D) SNMP

Answer:

D
