Question 1

Question Type: MultipleChoice

Which two statements are true regarding the Application Security feature of Workspace Environment Management (WEM)? (Choose two.)

Options:

A- It is recommended to NOT use both WEM Application Security and Windows AppLocker interfaces at the same time to manage rules.
B- Application Security rules set to 'Audit' are still enforced.
C- Exported Windows AppLocker rules CANNOT be imported into WEM.
D- It provides control over which applications users are permitted to run on a given machine.

Answer:

A, D

Explanation:

https://docs.citrix.com/en-us/workspace-environment-management/service/user-interface-description/security.html

Question 2

Question Type: MultipleChoice

What is the first step that the Enterprise Layer Manager (ELM) server takes when creating application layers?

Options:

A- Once the engineer manually creates the packaging machine, the ELM server initiates a connection to the packaging machine
B- Once a packaging machine is created, the next step is to finalize the targeted installation, using the application layering finalization software
C- Once the process to create a layer is initiated from the Layering Management Console, the ELM server then uses a connector to build a packaging machine
D- Once the packaging machine is finalized, any application installation or configuration should

be performed and completed

Answer:

C

Question 3

Question Type: MultipleChoice

Which database high availability option does Citrix recommend for Workspace Environment Management (WEM)?

Options:

A- Always On
B- Mirroring
C- Replication
D- Clustering

Answer:

A

Explanation:

https://docs.citrix.com/en-us/workspace-environment-management/current-release/system-requirements.html#sql-server-always-on

Question 4

Question Type: MultipleChoice

Which delegated administrator permission does a Citrix Engineer need to Choose to allow an administrator the ability to allocate resources to users and groups?

Options:

A- Transformer Manager
B- Action Manager
C- System Utilities Manager
D- Assignment Manager

Answer:

D

Question 5

Question Type: MultipleChoice

Which service on the StoreFront server is responsible for replication of user subscriptions?

Options:

A- Citrix Configuration Replication
B- Citrix Service Monitor
C- Citrix Credential Wallet
D- Citrix Subscriptions Store

Answer:

D

Explanation:

https://support.citrix.com/article/CTX272320

Question 6

Question Type: MultipleChoice

Scenario: A Citrix user is accessing a Windows 10 VDI machine using a personal laptop. The VDI is becoming unregistered frequently, which is making it difficult for the user to access it. In order to troubleshoot the issue, a Citrix Engineer is assigned to collect CDF logs.

On which two components should the engineer run Citrix Diagnostic Facility (CDF) control to

capture the required logs? (Choose two.)

Options:

A- Windows 10 VDI
B- Delivery Controller
C- StoreFront server
D- User's personal laptop

Answer:

A, B

Explanation:

https://support.citrix.com/article/CTX224308

Question 7

Question Type: MultipleChoice

Scenario: A Citrix Engineer has recently implemented Citrix Gateway in a Citrix Virtual Apps and Desktops environment. The engineer has done the testing with the test user account for authentication and enumeration of the published resources.

During the authentication at Citrix Gateway, the test user is getting the error ''403 - Forbidden: Access is denied."

Which two configuration steps are causing this error? (Select two.)

Options:

A- The StoreFront address in the Citrix Gateway Session Profile matches the site address in StoreFront.
B- DNS host entry is present on StoreFront to point to the Citrix Gateway virtual server.
C- The intermediate and root certificates in Citrix Gateway console are NOT linked.
D- The call back address is set to HTTP.

Answer:

C, D

Explanation:

https://support.citrix.com/article/CTX206900

Question 8

Question Type: MultipleChoice

Scenario: A Citrix Engineer is deploying a Citrix Virtual Apps and Desktops environment. The engineer noticed some Virtual Delivery Agent (VDA) machines are having registration issues.

Which three items should the engineer review within the company infrastructure to determine the root cause of the issue? (Choose three.)

Options:

A- Time synchronization (NTP) configuration of the VDA machines with the domain
B- The SSL certificates on the VDA machines and the Delivery Controller servers
C- The VDA machines registry setting for ListOfDDCs entries
D- DNS configurations on either the VDA machines or the Delivery Controller servers
E- A firewall with a blocked or failing inbound port 8080

Answer:

A, C, D

Explanation:

https://www.citrix.com/blogs/2018/02/13/the-most-common-vda-registration-issues-troubleshooting-steps/

Question 9

Question Type: MultipleChoice

Which three considerations are accurate when adding Active Directory (AD) objects to a

Workspace Environment Management (WEM) Configuration set? (Choose three.)

Options:

A- Multiple users can be added at the same time by separating names with semicolons.
B- Individual or multiple AD users can be added to the WEM console but NOT groups.
C- Machine objects can be added using the Add Object button or Add OU button.
D- Objects must be configured in WEM before actions can be applied to them.
E- Item Priority can be assigned to user or OU objects but NOT to machine objects.

Answer:

A, C, D

Explanation:

https://docs.citrix.com/en-us/workspace-environment-management/current-release/user-interface-description/active-directory-objects.html

Question 10

Question Type: MultipleChoice

Scenario: A Citrix Engineer is maintaining a Citrix Virtual Apps and Desktops environment. The engineer recently deployed Citrix App Layering for improved image management with Machine Creation Services (MCS). The infrastructure requires various 32-bit and 64-bit operating system platforms.

Which three considerations does the engineer need to be aware of when creating various OS Layers for the company infrastructure? (Select three.)

Options:

A- Application and Platform Layers are directly tied to the operating system layer on which they were created.
B- The ELM Repository storage maintains a maximum limit of 10 OS Layers that can be built and maintained on it at any given time.
C- Before an OS version or layer can be deleted from the Citrix App Layering Management console, it must first NOT be in use by an existing template.
D- The engineer needs a unique layer for each OS build created.
E- The engineer does NOT need to create a unique OS Layer for 32-bit and 64-bit versions of the

same OS type.
F- When preparing the OS Layer, the engineer should NOT include any hypervisor tools or utilities within the OS Layer.

Answer:

A, C, E

Explanation:

Platform and Application Layers are tied to the OS Layer

Before a version or layer can be deleted, it must not be in use by a template

Have one Operating System layer per Operating System (Windows 7 32-bit, Windows 7 64-bit, etc.)

https://support.citrix.com/article/CTX225952

Question 11

Question Type: MultipleChoice

Which component must a Citrix Engineer use to configure security settings on User Layer folders?

Options:

A- Delivery Controller
B- Site database
C- File server
D- Enterprise Layer Manager (ELM) Server Management console

Answer:

D

Explanation:

https://docs.citrix.com/en-us/citrix-app-layering/4/layer/enable-user-layers.html#configure-secur

ity-settings-on-user-layer-folders

Question 12

Question Type: MultipleChoice

Which User Layer requires the least amount of administrative effort to store user settings limited to Microsoft Outlook data and settings for a hosted shared desktop solution based on Windows Server 2012?

Options:

A- Session Office 365
B- Citrix Profile Management with Full
C- Full
D- Office 365

Answer:

A

Explanation:

https://docs.citrix.com/en-us/citrix-app-layering/4/layer/enable-user-layers.html

Question 13

Question Type: MultipleChoice

Scenario: A newly created Citrix Virtual Apps and Desktops site has sensitive information. The users consistently use different browsers for their daily tasks. A Citrix Engineer is looking for ways to minimize attacks like ransomware, phishing, and session hijacking.

Which two steps can the engineer take to minimize attacks without interfering with user productivity? (Select two.)

Options:

A- Disable access to specific browsers.
B- Disable all the user plugins.
C- Implement HTTP Strict Transport Security (HSTS).
D- Use HTTP response headers to send security policies to endpoint browsers.

Answer:

B, C

Explanation:

https://cheatsheetseries.owasp.org/cheatsheets/HTTP_Strict_Transport_Security_Cheat_Sheet.html
