Question 6

Question Type: MultipleChoice

An administrator is preparing to perform disaster recovery for many clients whose backups are stored on multiplexed tapes.

Which host property should the administrator modify, prior to the restores, to ensure the best recovery time?

Options:

A- set ''Enable unrestricted media sharing for all media servers''
B- increase ''Restore retries''
C- increase the ''MPX_RESTORE_DELAY'' setting on the master server
D- add the client IP addresses to ''Resilient Networks''

Answer:

B

Question 7

Question Type: MultipleChoice

How do you create a new disk pool in NetBackup?

Options:

A- From the NetBackup Web UI, navigate to the Storage > Disk Pools tab and click Add
B- From the NetBackup Administration Console, navigate to the Devices > Disk Pools tab and click New
C- From the NetBackup AdvancedDisk Storage Solutions Guide, run the nbdevconfig command with the -createpool option
D- From the NetBackup Cloud Administrator's Guide, configure a new cloud storage pool and convert it to a disk pool

Answer:

A

Explanation:

(To create a new disk pool in NetBackup, you can use the NetBackup Web UI by navigating to the Storage > Disk Pools tab and clicking Add, where you can specify the disk pool name, storage unit group, and other disk pool parameters.)
