Question 1

A computer user is downloading software from the Internet and notices the following at the end of the install file: "...x86.exe". Which of the following statements BEST represents what the "...x86.exe" means in the installation file?

Options:

A) x86 only supports an installation on a 32-bit CPU architecture.

B) x86 supports an installation on a 32-bit and a 64-bit CPU architecture.

C) x86 only supports an installation on a 64-bit CPU architecture.

D) x86 supports an installation on a 16-bit CPU architecture.

Answer:

A

Question 2

Consider the following statements:

```
if userin = "commander"
     then clearance = "topsecret"
      else if userin = "analyst"
            then clearance = "restricted"
             else
               clearance = "normal"
```

Given the input (userin) of "analyst", to which of the following would the clearance variable be set?

Options:

A) topsecret

B) normal

C) analyst

D) restricted

Answer:

D

Question 3

A global variable called "age" will be created in a program and incremented through the use of a function.

Which of the following data types should be defined with the age variable?

Options:

A) Integer

B) Float

C) Double

D) String

Answer:

A

Question 4

Consider the following statements:

```
if userin = "commander"
    then clearance = "topsecret"
    else if userin = "analyst"
        then clearance = "restricted"
        else
         clearance = "normal"
```

Given the input (userin) of "analyst", to which of the following would the clearance variable be set?

Options:

A) topsecret

B) normal

C) analyst

D) restricted

Answer:

D

Question 5

A computer user is downloading software from the Internet and notices the following at the end of the install file: "...x86.exe". Which of the following statements BEST represents what the "...x86.exe" means in the installation file?

Options:

A) x86 only supports an installation on a 32-bit CPU architecture.

B) x86 supports an installation on a 32-bit and a 64-bit CPU architecture.

C) x86 only supports an installation on a 64-bit CPU architecture.

D) x86 supports an installation on a 16-bit CPU architecture.

Answer:

A

Question 6

A global variable called "age" will be created in a program and incremented through the use of a function.

Which of the following data types should be defined with the age variable?

Options:

A) Integer

B) Float

C) Double

D) String

Answer:

A
