Question 1

Question Type: MultipleChoice

What is the best method of gathering attenuation measurements from any building materials or objects?

Options:

- A-** After measuring the RSSI in free space 5 meters (16.5 feet) apart, put an AP 4 meters (13 feet) away from the wall or object on one side and your measuring device 0.67 meters (2 feet) away from the wall or object on the other side. Take measurement and compare the difference.
- B-** Use the pre-built attenuation values in the predictive design tool.
- C-** After measuring the RSSI in free space 1 meter (3 feet) apart, put an AP 0.32 meters (1 foot) away from the wall or object on the other side. Take measurements and compare the difference.
- D-** Look on the Internet for attenuation values for each one of the materials that might attenuate the Wi-Fi signal using the material provider's websites.

Answer:

C

Question 2

Question Type: MultipleChoice

What service must be implemented on your customers' network to authenticate users against an LDAP database prior to access to the WLAN infrastructure being granted?

Options:

- A- NTP
- B- RADIUS
- C- SFTP
- D- TLS

Answer:

B

Question 3

Question Type: MultipleChoice

Using a SCA means that all APs will be using the same channel in a given layer. How is the AP with which the client associates determined?

Options:

- A-** All APs share a virtual IP address. A controller will tell the closest AP to the client to communicate with it, since it has a greater RSSI from the client.
- B-** All APs share a virtual Multicast Address. A controller will tell the closest AP to the client to communicate with it, since it has a greater RSSI from the client.
- C-** All APs share a virtual BSSID. A controller will tell the closest AP to the client to communicate with it, since it has a greater RSSI from the client.
- D-** The client selects the AP based on a known set of MAC to BSSID mappings stored in the clients authorized SSID listing.

Answer:

D

Question 4

Question Type: MultipleChoice

What limitation exists when WMM is not enabled on an 802.11n WLAN?

Options:

- A- 802.11 QoS will not be available
- B- The maximum channel-width will be 20MHz
- C- EDCA values will change
- D- Only two ACs will be available

Answer:

A

Question 5

Question Type: MultipleChoice

Which document provided to your customer should include all devices and parts that are going to be used during the deployment of their WLAN infrastructure?

Options:

- A- SoW
- B- BoM
- C- Design report
- D- Project plan

Answer:

B

Question 6

Question Type: MultipleChoice

When deploying APs outdoors, what additional component needs to be used that is not needed indoors?

Options:

- A- Antennas

B- NEMA enclosures

C- Ethernet cables

D- PoE

Answer:

B
