Question 1

Question Type: MultipleChoice

An organization plans to deploy a deduplication solution in their data center environment They are concerned about the application servers' performance and a long backup window during backups. However, they want to retain their existing backup application.

Which deduplication solution(s) should be recommended?

Options:

A- Target-based deduplication

B- Source-based with variable-length deduplication

C- Source-based with fixed-length block deduplication

D- Source-based global deduplication

Answer:

B

Question 2

Question Type: MultipleChoice

Why is it important for organizations lo deploy business continuity solutions in their data center environment?

Options:

A- Avoid security risks that destroy the business data

B- Employ compliance requirements for data protection

C- Eliminate the time required for maintenance of IT resources in the data center

D- Reduce the cost of protecting data within and outside data centers

Answer:

B

Question 3

Question Type: MultipleChoice

in a NAS environment, which file system provides a public or open variation of the Server Message Block (SMB) protocol and uses the TCP/IP protocol?

Options:

A- Common Internet File System (CIFS)

B- New Technology File System (NTFS)

C- Network File System (NFS)

D- Hadoop Distributed File System (HDFS)

Answer:

A

Question 4

Question Type: **MultipleChoice**

What is a function of a continuous data protection (CDP) appliance?

Options:

A- Migrates deduplicated data from the source volume to the target volume during replication

B- Manages both local and remote replications within and across data centers

C- Stores all data that has changed from the time the replication session started

D- Intercepts writes to the production volume and splits each write into two copies

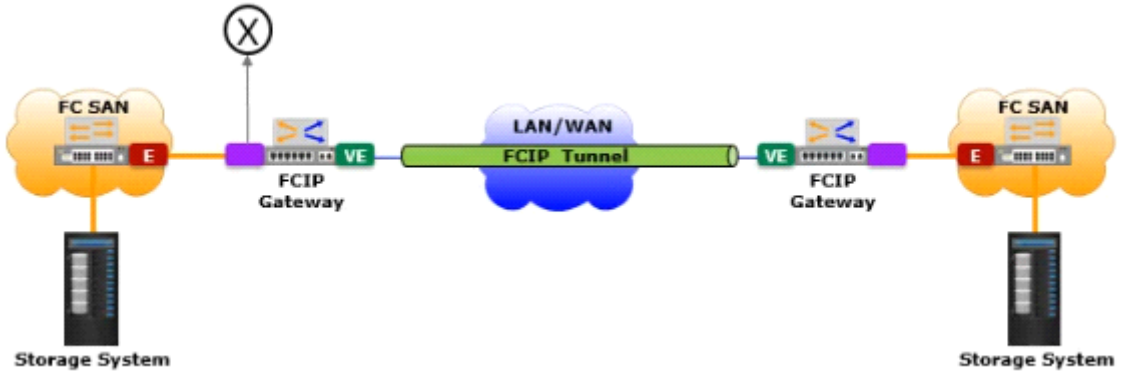
Answer:

A

Question 5

Question Type: MultipleChoice

Based on the exhibit, what does the "X" represent in the FCIP tunnel configuration?



Options:

A- E_port

B- EX_port

C- F_port

D- VE_port

Answer:

A

Question 6

Question Type: MultipleChoice

An organization plans to deploy a deduplication solution in their data center environment They are concerned about the application servers' performance and a long backup window during backups. However, they want to retain their existing backup application.

Which deduplication solution(s) should be recommended?

Options:

A- Target-based deduplication

B- Source-based with variable-length deduplication

C- Source-based with fixed-length block deduplication

D- Source-based global deduplication

Answer:

B

Question 7

Question Type: MultipleChoice

Why is it important for organizations lo deploy business continuity solutions in their data center environment?

Options:

A- Avoid security risks that destroy the business data

B- Employ compliance requirements for data protection

C- Eliminate the time required for maintenance of IT resources in the data center

D- Reduce the cost of protecting data within and outside data centers

Answer:

B

Question 8

Question Type: MultipleChoice

in a NAS environment, which file system provides a public or open variation of the Server Message Block (SMB) protocol and uses the TCP/IP protocol?

Options:

A- Common Internet File System (CIFS)

B- New Technology File System (NTFS)

C- Network File System (NFS)

D- Hadoop Distributed File System (HDFS)

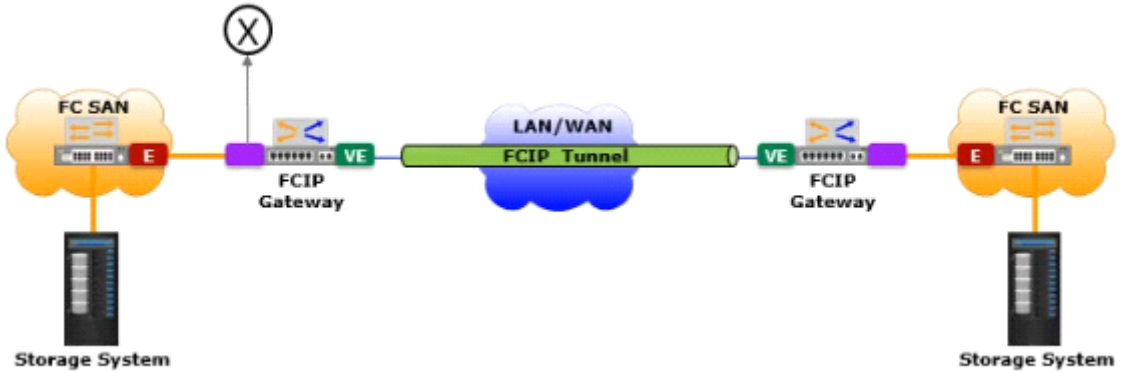
Answer:

A

Question 9

Question Type: **MultipleChoice**

Based on the exhibit, what does the "X" represent in the FCIP tunnel configuration?



Options:

A- E_port

B- EX_port

C- F_port

D- VE_port

Answer:

A

Question 10

Question Type: MultipleChoice

What is a function of a continuous data protection (CDP) appliance?

Options:

A- Migrates deduplicated data from the source volume to the target volume during replication

B- Manages both local and remote replications within and across data centers

C- Stores all data that has changed from the time the replication session started

D- Intercepts writes to the production volume and splits each write into two copies

Answer:

A
