Question 1

Question Type: MultipleChoice

Which risk management step deploys various security mechanisms that minimize risks impacts?

Options:

A- Identification

B- Mitigation

C- Assessment

D- Monitoring

Answer:

B

Question 2

Question Type: MultipleChoice

Which type of cloud tool controls resources such as compute, storage, and network?

Options:

A- Management and operation

B- Automation and orchestration

C- Collaboration and communication

D- Monitoring and alerting

Answer:

B

Question 3

Question Type: **MultipleChoice**

A development group is using an iterative and incremental software development method.

Which standard is being utilized?

Options:

A- Agile

B- ITIL

C- DevOps

D- Orchestration

Answer:

A

Question 4

Question Type: **MultipleChoice**

Which two are key requirements for fault tolerance?

Options:

A- Document SPOF and Fault Elimination

B- Fault Isolation and Eliminate SPOF

C- Network Isolation and Eliminate SPOF

D- RAID Storage and Fault Isolation

Answer:

B

Question 5

Question Type: MultipleChoice

Which platform provides a converged infrastructure solution?

Options:

A- VxRail

B- PowerStore

C- VxBlock

D- PowerFlex

Answer:

C

Question 6

Question Type: MultipleChoice

What is a benefit of synchronous remote replication?

Options:

A- Saves network bandwidth by replicating only deduplicated data

B- Replicates data across any geographic location without impacting response time

C- Ensures that source and replica always have identical data

D- Supports repeated write I/O to the same location to improve replication performance

Answer:

C

Question 7

Question Type: MultipleChoice

What is true about the Infrastructure as a code function?

Options:

A- Develops and deploys applications using CI/CD tools

B- Develops and deploys applications using script files

C- Manually manages and provisions IT resources

D- Manages and provisions IT resources using script files

Answer:

D

Question 8

Question Type: MultipleChoice

What is a benefit of application virtualization?

Options:

A- Allows inclusion of standard applications into an end-point image

B- Eliminates the need for OS modifications

C- Enables online data migrations between storage systems

Answer:

A

Question 9

Question Type: MultipleChoice

Which data storage type uses a non-hierarchical address space to store data?

Options:

A- Block

B- Object

C- File

Answer:

B

Question 10

Question Type: MultipleChoice

What are the key functions of a control plane?

Options:

A- User and role access -
Configuration baselines -
Services execution

B- Configuration messaging -
Statistics -

Status

C- Asset discovery -
Resource abstraction and pooling
Resource provisioning

D- Data processing -
Asset discovery -
Resource abstraction and pooling

Answer:

C

Question 11

Question Type: **MultipleChoice**

An organization must deploy remote replication between two sites that are 1200 km (745 miles) apart, without impacting application response time.

Which solution should be recommended?

Options:

A- Hypervisor-based synchronous replication

B- Synchronous replication

C- Asynchronous replication

Answer:

C

Question 12

Question Type: MultipleChoice

What does a service attribute specify?

Options:

A- Relationships between services

B- Configurations of service components

C- Structure of a service

Answer:

B
