Question 1

Question Type: MultipleChoice

What needs to be created in BCSD to link multiple SRDF/A sessions?

Options:

- A- Composite Group
- B- Logical relationship
- C- Consistency Group
- D- MSC logical relationship

Answer:

C

Question 2

Question Type: MultipleChoice

SRDF/A has been enabled between two PowerMax arrays. An extended loss of all RDF links occurs.

What is the state of the RDF pair after link connectivity is restored?

Options:

- A- Split
- B- Failed Over
- C- Suspended
- D- Partitioned

Answer:

D

Question 3

Question Type: MultipleChoice

A TimeFinder SnapVX snapshot of source volumes is linked to target volumes. The target volumes are being used for application testing.

What is recommended prior to a relink operation?

Options:

- A- Stop accessing both the source volumes and the target volumes
- B- Continue accessing the source volumes; stop accessing the target volumes
- C- Stop accessing the source volumes; continue accessing the target volumes
- D- Continue accessing both the source volumes and the target volumes

Answer:

D

Question 4

Question Type: MultipleChoice

What is a characteristic of SRDF/Metro?

Options:

- A-** Data must be stored in cache on both sides before an acknowledgement is sent to the host.
- B-** Multiple capture sets permit smaller cycles of data to be buffered on the R1 side and transferred to the R2 side.
- C-** A dependent-write consistent copy is maintained between the R1 and R2 devices.
- D-** Devices that have the Consistency Exempt attribute set can be controlled independently of the other devices.

Answer:

C

Question 5

Question Type: MultipleChoice

A customer is planning an SRDF/S implementation. They are concerned about the performance of their application when the initial synchronization of the data occurs.

Which SRDF mode should be used during the initial synchronization period?

Options:

A- Mixed

- B- Adaptive copy disk
- C- Dynamic RDF
- D- SRDF/A

Answer:

B

Question 6

Question Type: MultipleChoice

What action can an administrator perform on a PowerMax using VSI?

Options:

- A- View replication sessions
- B- Manage High Availability
- C- Manage re-syncing objects
- D- View capacity utilization

Answer:

A

Question 7

Question Type: MultipleChoice

Which formula is used to calculate the Data Reduction Ratio?

Options:

- A- $\text{Snapshot Total} + (\text{Subscribed Total} / \text{User Used})$
- B- $\text{Subscribed Allocated} + (\text{Modified NonShared} / \text{User Used})$
- C- $\text{Snapshot Total} + (\text{Subscribed Allocated} / \text{User Used})$
- D- $\text{Subscribed Allocated} / (\text{Modified NonShared} + \text{User Used})$

Answer:

A

Question 8

Question Type: MultipleChoice

Which organization created the SMI-S standard for storage management and promotes vendor neutral architectures and standards?

Options:

A- FIPS

B- SNIA

C- IEEE

D- ISO

Answer:

B

Question 9

Question Type: MultipleChoice

A storage architect is looking for best practices to expand an existing single V-Brick VMAX All Flash 250. They are planning to expand the VMAX configuration to a dual V-Brick model for better performance.

What is a consideration?

Options:

- A- Both V-Bricks must contain 1 TB of cache each
- B- RAID type of both V-Bricks must be the same
- C- Cache size of both V-Bricks must be equal
- D- Number of drives must be less than or equal to 96

Answer:

C

Question 10

Question Type: MultipleChoice

When implementing SRDF/Metro with Array Witness, what is a requirement of the witness array?

Options:

- A- Empty RDF group from witness to source and target
- B- vApp running on a VMware ESXi server
- C- Minimum of two witness arrays
- D- Two RDF groups with source and target devices

Answer:

D

Question 11

Question Type: MultipleChoice

A storage administrator uses Unisphere for PowerMax to provision new storage from a VMAX All Flash array. Which Workload Type is recommended for a combination of small and large block I/O workloads?

Options:

- A- DSS
- B- Optimized
- C- OLTP
- D- None

Answer:

D

Explanation:

Reference <https://docs.openstack.org/cinder/train/configuration/block-storage/drivers/dell-emc-powermax-driver.html>

Question 12

Question Type: MultipleChoice

What is a characteristic of a Secure Snapshot?

Options:

- A- Administrators are only able to delete a Secure Snapshot before its expiration date
- B- The Secure Snapshot remains secure after its expiration date, as long as it is linked
- C- Administrators can only extend the expiration date before the Secure Snapshot expires
- D- The Secure Snapshot can be converted to a traditional snapshot

Answer:

B
