Question 1

Question Type: DragDrop

Correctly arrange the sequence of the write operation in PowerStore.

If the I/O is determined to be a write, the data is copied into the write cache on the NVRAM drives

Data is copied from the Write Cache and is passed through the deduplication and compression logic

For each write I/O that enters the system, the information is passed between the Nodes using token

I/O enters Node and is saved within the Node DRAM memory

Information is safely stored on the NVRAM drives and all other actions are complete, the host is acknowledged

Step 1

Step 2

Step 3

Step 4

Step 5
