Question 1

Question Type: MultipleChoice

After successfully configuring a remote connectivity solution between the customer's XMS and their email server, the customer asks you to validate that the Connect-Home files are being sent successfully to EMC's business systems for processing.

Which XMCLI command should you use to complete this task?

Options:

A- send-syr-notification test-event

B- send-email-notification test-event

C- send-smtp-notification test-event

D- test-xms-tcp-connectivity

Answer:

A

Question 2

Question Type: MultipleChoice

Which XMCLI command can be used to confirm connectivity between the XMS and an ESRS Gateway Server?

Options:

A- test-xms-tcp-connectivity

B- test-ip-connectivity

C- show-syr-notifier

D- show-xms-info

Answer:

A

Question 3

Question Type: MultipleChoice

Which XMCLI command can be used to confirm ESRS and Connect-Home solutions are properly configured and operational on the XMS?

Options:

A- show-syr-notifier

B- show-esrs-notifier

C- show-email-notifier

D- show-xms-info

Answer:

A

Question 4

Question Type: MultipleChoice

What information is required to successfully create a cluster?

Options:

A- Expected number of X-Bricks

Storage Controller management IP address
Cluster Name

B- Storage Controller Tech Port IP
XMS management IP address
Cluster Name

C- Storage Controller IPMI IP address
Storage Controller management IP address
Expected number of X-Bricks

D- Storage Controller Tech Port IP
XMS Tech Port IP
Storage Controller IPMI IP address

Answer:

A

Question 5

Question Type: MultipleChoice

You are in the process of implementing a new cluster and have experienced an issue during initialization. To assist EMC Global Technical Support with their investigation, you are requested to collect a set of logs.

What should you use to generate the required log file bundle?

Options:

A- Easy-Install CLI

B- XMCLI

C- SOAP

D- REST

Answer:

A

Question 6

Question Type: **MultipleChoice**

Which user account should be used to place software images on the XMS in preparation for initializing a cluster?

Options:

A- xmsupload

B- xmsadmin

C- admin

D- xinstall

Answer:

A

Question 7

Question Type: MultipleChoice

You have successfully completed the initialization of an XtremIO cluster. You run the show-storage-controllers-info XMCLI command.

What are the expected values of State and Conn-State for all the Storage Controllers?

Options:

A- State: healthy
Conn-State: connected

B- State: active
Conn-State: connected

C- State: healthy and enabled
Conn-State: healthy and enabled

D- State: active and enabled
Conn-State: active and enabled

Answer:

A

Question 8

Question Type: MultipleChoice

Which XMCLI command should be executed on the XMS to form an XtremIO cluster?

Options:

A- create-cluster

B- add-cluster

C- modify-clusters-configuration

D- modify-xms-parameters

Answer:

A

Question 9

Question Type: MultipleChoice

An IT service provider is planning to deploy two XtremIO clusters with four X-Bricks each. Both the clusters should be managed by dedicated storage specialists.

What is a consideration for this deployment?

Options:

A- One XMS must be deployed for each cluster

B- Physical XMS is not supported for multi-cluster management

C- 8912 volumes can be managed by XMS from all clusters

D- Only 256 volumes are supported per Consistency Group

Answer:

A
