Question 1

Question Type: MultipleChoice

A GIS analyst has run Ordinary Least Squares (OLS) regression on a dataset for the country of India in order to determine contributing factors to a phenomenon. While the analysis results seem reliable, there is an asterisk on the Koenker statistic in the output report of the OLS.

Which tool does this asterisk suggest the analyst should run next?

Options:

- A- Geographically Weighted Regression (GWR)
- B- Generate Spatial Weights Matrix
- C- Generalized Linear Regression (GLR)

Answer:

B

Question 2

Question Type: MultipleChoice

In ArcGIS Pro, a GIS analyst adds a mosaic dataset to a map and notices that the entire mosaic area is covered with a black and white checkerboard.

Which tool should the analyst use to make the images visible in the map as part of the mosaic dataset?

Options:

- A- Define Overviews
- B- Build Pyramids
- C- Repair Mosaic Dataset Paths

Answer:

C

Question 3

Question Type: MultipleChoice

Which ArcGIS Pro tab gives a user the option to export a map layout to a file?

Options:

A- Project

B- Map

C- Share

Answer:

C

Question 4

Question Type: MultipleChoice

A GIS analyst has a countrywide parcel dataset and needs to determine the property owners for the northern region of the country. The analyst wants to find owners whose last name contains Jon.

Which query should the analyst use?

Options:

A- Region = 'North' AND OwnerName LIKE 'Jon'

B- Region = 'North' OR OwnerName LIKE 'Jon'

C- Region = 'North' AND OwnerName = 'Jon'

Answer:

A

Question 5

Question Type: MultipleChoice

A GIS analyst is assigned to update an existing roads feature class (line features) with new features and information obtained from a third-party agency. However, the column names in the new feature class and the old feature class do not match.

Which geoprocessing tool should the analyst use to update the old feature class by correctly matching the columns?

Options:

- A- Append with 'Schema Type' as 'Test'
- B- Append with 'Schema Type' as 'No_Test'
- C- Union with 'Attributes To Join' set as 'All Attributes'

Answer:

B

Question 6

Question Type: MultipleChoice

An organization with many editors needs to know when features have been created and edited, as well as who edited the features.

Where should the GIS administrator enable this capability?

Options:

- A- The Manage options accessed by right-clicking geodatabase
- B- The Design options accessed by right-clicking the shapefile
- C- The Manage options accessed by right-clicking the feature dataset

Answer:

C

Question 7

Question Type: MultipleChoice

A GIS analyst is trying to buffer single point features one at a time within a feature class by interactively selecting it in a map before buffering. Multiple points are being selected, although one row in the attribute table is highlighted. The analyst does not want to modify the original data.

Which tool should be used to solve this issue?

Options:

- A- Explode
- B- Multipart To Singlepart
- C- Split

Answer:

A

Question 8

Question Type: MultipleChoice

A GIS analyst is about to run analysis using multiple feature layers from the current map. They want to do one final check to ensure which feature classes do and do not have definition queries as expected.

How should the analyst check this most efficiently?

Options:

- A- Select layers in Contents > Feature Layer - Data tab > Definition Query
- B- Contents pane > Filter > Active Definition Query
- C- Right-click layer in Contents > Properties > Definition Query

Answer:

B
