Answer:

C

Question 4

Question Type: MultipleChoice

Which of the following best describes the difference between the use of walkthroughs and inspections in this scenario?

Options:

- A- Walkthroughs of specifications would enable the individuals to learn more about the system being developed, whilst inspections would allow the organization as a whole to improve.
- B- Walkthroughs of signalling rules will be more cost effective than inspections.
- C- Inspections of code should be carried out by the developers, whilst code walkthroughs should include just the testers.
- D- A walkthrough is an example of a static testing technique, whilst an inspection is an example of a dynamic testing technique.

Answer:

A

Question 5

Question Type: MultipleChoice

Which of the following is the main purpose of an incident tracking process?

Options:

- A- To identify the average number of steps required to recreate each incident.
- B- To calculate the average turnaround times per defect.
- C- To identify the priority of each incident.
- D- To understand the status of each incident at any given time.

Answer:

D

Explanation:

Data is transmitted over the internet as a series of packets. Each packet is sent to its destination via the best available route. The decision on the best available route is made by a series of routers on the internet. In order to make the best decision on the route to take, the router:

- 1) Scans the destination address and matches it against rules set up in a configuration table.
 - 2) Checks the performance of the primary connection to see if it is good enough to send the packet. If not, it seeks an alternative.
- Routers handle many millions of packets being sent at the same time. Packets can take the form of email messages, data files etc.

Question 6

Question Type: MultipleChoice

Which of the following methods of test estimation would be most appropriate for each Sprint?

Options:

- A- Ask the testers to talk to each other and reach a consensus.
- B- Take 30% of the total development time required for the Sprint.
- C- Conduct a test point analysis on the content and navigation requirements.
- D- Use metrics from the last accessibility project at MSC.

Answer:

A

Question 7

Question Type: MultipleChoice
