Question 1

Question Type: MultipleChoice

A company has non-persistent workloads provisioned with Citrix Machine Creation Services (MCS). The administrator needs to utilize these workloads on their Nutanix environment. Moreover, the administrator would like to deploy many VMs in the future.

In addition to converting the base images to Nutanix AHV, what should the administrator provision to accomplish this task?

Options:

- A- New catalogs on AHV with the converted VMs
- B- New cloned images on AHV with the converted VMs
- C- New cloned images on AHV with the converted image
- D- New catalogs on AHV with the converted image

Answer:

D

Question 2

Question Type: MultipleChoice

What Flow Network Security function is a schema of rules for specifying/enforcing a desired behavior and has one or more policies?

Options:

- A- Category
- B- Category set
- C- Security policy
- D- Security policy model

Answer:

C

Question 3

Question Type: MultipleChoice

An administrator has been asked to investigate encrypting intra-cluster storage traffic.

Which factor should be considered in this implementation?

Options:

- A- Lack of encryption for Volume-Group connections
- B- Stargate traffic between CVMs remains unencrypted
- C- Increased IO latency and CVM CPU utilization
- D- Higher User-VM CPU and memory utilization

Answer:

C

Question 4

Question Type: MultipleChoice

An administrator needs to add two new nodes to an existing Nutanix cluster. In addition to the default virtual switch vs0, the cluster also has two additional vSwitches defined: vs1 and vs2.

What step does the administrator need to take prior to expanding the cluster?

Options:

- A- Ensure the physical NICs in the existing and new nodes are operating at the same speed.
- B- Configure bridge br1 and br2 on the new nodes.
- C- Ensure AOS and AHV on the new nodes match the cluster versions.
- D- Disable the virtual-switch feature on the cluster.

Answer:

A

Question 5

Question Type: MultipleChoice

An administrator has been tasked with increasing security by setting permissions based on department.

Which feature can the administrator use to best accomplish this task?

Options:

- A- Creation of a single local user for each department
- B- Securing traffic by through Network Segmentation
- C- Cluster Lockdown through PC
- D- Role-based access control (RBAC)

Answer:

D

Question 6

Question Type: MultipleChoice

Which data type should be stored in a container with compression disabled?

Options:

- A- VM Templates / ISOs
- B- VDI User Profiles
- C- VM Snapshots
- D- Encrypted Data

Answer:

D

Question 7

Question Type: MultipleChoice

An administrator needs to enable Data-At-Rest Encryption on an AHV cluster. The cluster has a mix of Self-Encrypting Drives (SEDs) and standard SSDs.

Which option is supported in this scenario?

Options:

- A- Cluster-level software encryption
- B- Hardware encryption only on nodes equipped with SEDs
- C- Container-level hardware encryption
- D- Both hardware and software encryption at the cluster level

Answer:

A

Question 8

Question Type: MultipleChoice

An administrator has deployed a Windows 11 desktop pool brokered by VMware Horizon. When troubleshooting high CPU utilization and flash tier usage, it is noticed that flash tier usage ramps up quickly during business hours, but comes back down during off-hour curator scans.

What could explain this?

Options:

- A- Windows screensaver should be disabled.
- B- This is normal behavior, nothing to do.
- C- Indexing services need to be disabled.
- D- Flash mode should be enabled for the VM.

Answer:

C

Question 9

Question Type: MultipleChoice

An administrator is tasked with providing dedicated VDIs to developers.

Which deployment method type requires the least amount of effort to achieve this task?

Options:

- A- Non-persistent pool
- B- Dedicated VDI provisioned from MCS
- C- Static-built Remote PC pool
- D- Dedicated VDI provisioned from PVS

Answer:

B

Question 10

Question Type: MultipleChoice

An administrator has configured three web servers that are used to access VDIs. One of the cluster nodes has become unresponsive and users can no longer reach a web server VM to access their VDI.

What should the administrator configure to avoid this issue in the future?

Options:

- A- Create an Isolation Policy.
- B- Create Affinity rules.
- C- Create Anti-Affinity rules.
- D- Create a Protection Policy.

Answer:

C

Question 11

Question Type: MultipleChoice

An administrator is analyzing performance of an application VM hosted on AHV. The administrator is currently viewing the metrics page on a VM in Prism Central, and wants to be able to quickly review the Storage Controller IOPS graph at a later date.

How can the administrator accomplish this task?

Options:

- A- Use Prism Element to refresh the graph.
- B- Export the current view as a scheduled email.
- C- Generate a dashboard summary report.
- D- Add the metric to an available analysis session.

Answer:

D

Question 12

Question Type: MultipleChoice

Which container level storage configuration has the most efficient space savings for full clones?

Options:

- A- Deduplication on and Compression on
- B- Deduplication on and Compression off
- C- Deduplication off and Compression on
- D- Deduplication off and Compression off

Answer:

C
