## Question 1

---

Question Type: MultipleChoice

---

Identify the three true statements about tuning FM applications. (Select three.)

Options:

- A- Enabling ENABLEBACKGROUNDPAGEIN and setting it to 1 improves system performance.
- B- FM never addresses more than 3 gigabytes of memory on a 32 bit operating system.
- C- Subcubes in FM have no impact on performance.
- D- Memory management is an important tuning step for FM applications.
- E- The performance of the underlying repository for FM has no impact on the performance of FM.

Answer:

B, D, E

## Question 2

---

Question Type: MultipleChoice

---

Financial Management provides enabling technologies to complete which three close processes? (Choose three.)

Options:

- A- Load data from one or more ledger systems and calculate data.
- B- Perform adjustments, translations, intercompany activities, and consolidations.
- C- Create the annual detail budget.
- D- Publish run reports
- E- Perform profitability and cost analysis with prebuild allocation templates.

Answer:

C, D, E

## Question 3

---

Question Type: MultipleChoice

---

The Value dimension stores detail from child to parent for which dimension?

Options:

---

- A- View
- B- Entity
- C- Account
- D- Currency
- E- Scenario

Answer:

---

B

Explanation:

---

The Value dimension represents the different types of values stored in your application, and can include the input currency, parent currency, adjustments, and consolidation detail such as proportion, elimination, and contribution detail. For example, the Entity Currency member stores the value for an entity in its local currency. The Parent Currency member stores the value for an entity translated to the currency of its parent entity. The Value dimension is useful for providing an audit trail of the transactions applied to data.

## Question 4

---

Question Type: MultipleChoice

---

Which clearing data using the Database Management module, dimension is not included for selection?

Options:

---

- A- Scenario
- B- Account
- C- Custom1
- D- Entity
- E- Value

Answer:

C

## Question 5

---

Question Type: MultipleChoice

---

Identify the four processes through which Financial Management supports a virtual close.  
(Choose four.)

Options:

- A- A fully automated consolidation tool that combines financial data across many ledgers and consolidates to a corporate or business unit level
- B- Automatic posting of eliminating entries, accrual entries, and allocations
- C- Automated collection, mapping, verification, and movement of data
- D- Automated intercompany processing
- E- Analysis capabilities throughout close over the Web and in Excel

Answer:

A, C, D, E

## Question 6

---

Question Type: MultipleChoice

---

For metadata loads, you can import changes to metadata for which three application elements?  
(Choose three.)

Options:

- A- Periods
- B- Accounts
- C- Entities
- D- Currencies
- E- Value

Answer:

---

B, C, D

## Question 7

---

Question Type: MultipleChoice

---

EPMA provides a Shared Dimension Library for maintaining EPM dimensions. Identify two reasons that would make you consider using EPMA to maintain dimensions over FM Classic metadata files? (Select two.)

Options:

---

- A- You can use the same metadata file format from FM Classic to import dimensions In EPMA.
- B- Dimensions can be shared across applications or can be local to a specific application.
- C- In EPMA, you can make a change to a member in a shared dimension once and sync ft across FM and Planning applications.
- D- You can assign member access security in the EPMA dimension library for a shared dimension and sync it across FM and Planning applications.

Answer:

---

C, D
