Question 1

Question Type: MultipleChoice

Which statement is true about how if-then rules are processed during an inferencing session?

Options:

- A- Rules are evaluated in the order in which they were added to the ruleset.
- B- A particular rule can be fired only once in an inferencing session.
- C- The effective date set for a rule can take it out of consideration for evaluation.
- D- A priority setting of 1 causes the rule to fire during each inferencing session.
- E- Rules with multiple IF conditions receive higher priority during evaluation.

Answer:

A, B

Question 2

Question Type: MultipleChoice

Which two statements are true about configuring service tasks? (Choose two.)

Options:

- A-** A service task can be configured to invoke a process or service asynchronously.
- B-** Although you call a file adapter as a service from your BPMN diagram, no linkage between your BPMN process and the external reference appears in the SOA Composite Editor.
- C-** You can invoke a BPEL process by using a service task.
- D-** The implementation of a service task can be either a process call or a service call.

Answer:

B, C

Question 3

Question Type: MultipleChoice

Which two statements are correct about business indicators? (Choose two.)

Options:

- A- They can be captured at measurement marks.
- B- Dimensions allow the user to capture numerical values.
- C- All business indicators are captured at sampling points and a subset is captured at measurement marks.
- D- Counters are used for interval start and interval stop measurements.

Answer:

A, C

Explanation:

A Measure Business Indicator is used to capture something that can be measured.

The BPMN Service Engine automatically stores the data in the dimension business indicators in the pre-defined and custom sampling points defined for your process.

Question 4

Question Type: MultipleChoice

Which two can be added as members of a static approval group? (Choose two.)

Options:

- A- Users
- B- Groups
- C- Application roles
- D- other approval groups
- E- WebLogic administrators

Answer:

A, D

Explanation:

Members of a static approval group can be either users or other approval groups.

Question 5

Question Type: MultipleChoice

Which three attributes are unique to adaptive case management-based processes as compared to traditional BPMN-based processes?
(Choose three.)

Options:

- A- The sequence of execution of activities is determined by process participants at run time.
- B- They are routine, well-defined, structured processes.
- C- New stakeholders, not just task participants, may be added at run time.
- D- They are exclusively event-driven.
- E- They involve human-centric processing.

Answer:

A, C, D

Question 6

Question Type: MultipleChoice

Which two statements accurately identify capabilities available for rules testing? (Choose two.)

Options:

- A-** You can create a test suite or a test template without first creating a design function.
- B-** You can test rulesets by creating a business rules function that calls the decision function.
- C-** You can use Enterprise Manager to test rules via a decision function.
- D-** You can mark individual test suites as "draft" to turn them off for test validation.

Answer:

B, D

Explanation:

You can test rulesets by creating a decision function and calling the decision function from Rules Designer with an Oracle Business Rules function.

Draft Testcheck box to turn off the test validation.

Question 7

Question Type: MultipleChoice

Which two statements are true about out-of-the-box metrics support in BPM Suite? (Choose two.)

Options:

- A-** If you want to know average time spent in each activity in your process, you can look at the workload per process dashboard in Business Process Workspace.
- B-** By default, in standard dashboards that display data about in-flight instances, there is a 30-minute delay before up-to-date data appear in the charts.
- C-** You can only view out-of-the-box metrics in charts created in Business Process Workspace.
- D-** During process execution, when a sampling point is reached, the BPMN Service Engine collects all standard process metrics that are prespecified out-of-the-box.

Answer:

C, D

Question 8

Question Type: MultipleChoice

Which two tools can you use to create charts for a dashboard that displays metrics for your BPM project? (Choose two.)

Options:

- A- BPM Studio
- B- BAM Composer
- C- BPM Process Composer
- D- BPM Process Workspace
- E- WebCenter Process Spaces

Answer:

B, D

Question 9

Question Type: MultipleChoice

Which two statements are true for decision table rules? (Choose two.)

Options:

- A-** They can have multiple conditions, but share only one action.
- B-** They typically contain a set of rules that covers all combinations or where no two combinations conflict.
- C-** Both gap detection and conflict resolution cannot be turned off at the same time.
- D-** A priority can be set for an entire decision table.

Answer:

B, D

Explanation:

A Decision Table is an alternative business rule format that is more compact and intuitive when many rules are required to analyze many combinations of property values. You can use a Decision Table to create a set of rules that covers all combinations or where no two combinations conflict.
