### Answer:

---

A

## Question 8

---

**Question Type:** MultipleChoice

---

As life cycle models adapt to meet the needs of the mobile application market, how will the interaction between the developers and testers change?

**Options:**

---

- A- The interaction will become more formal
- B- Detailed requirements documentation will replace stand up meetings
- C- Developers and testers will return to more traditional, separate roles
- D- Collaboration between developers and testers will increase

**Answer:**

---

D

**Explanation:**

---

D is correct. Developers and testers will work more closely together as the lifecycle shortens and the need for good testing is pushed to the left in the development cycle.
