Question 1

Question Type: MultipleChoice

A FileNet Deployment Professional has been using the Configuration Manager tool to install a new Content Platform Engine environment. The status of several of the tasks that have already been run in this environment needs to be checked.

What command is passed to the Configuration Manager to check the status of the configuration tasks?

Options:

A- checkstatus

B- installstatus

C- systemstatus

D- configstatus

Answer:

C

Question 2

Question Type: MultipleChoice

A Content Platform Engine is deployed within an IBM WebSphere Application Server environment.

To enable Kerberos, what additional application login module needs to be created and configured within WebSphere Application Server?

Options:

A- KerberosServiceFileNetP8

B- IBMFileNetP8KerberosService

C- FileNetP8KerberosService

D- KerberosServicelBMFileNetP8

Answer:

C

Question 3

Question Type: MultipleChoice

Which role is typically responsible for configuring the directory servers required by FileNet P8 components?

Options:

A- Application server administrator

B- Security administrator

C- Installation administrator

D- Database administrator

Answer:

A

Question 4

Question Type: MultipleChoice

What happens when the Content Platform Engine JVM heap runs out of memory?

Options:

A- All processing in the JVM stops.

B- The JVM restarts to clear its memory.

C- The JVM borrows memory from other clusters members.

D- The Content Platform Engine restarts to clear its memory.

Answer:

A

Explanation:

https://www.ibm.com/docs/en/filenet-p8-platform/5.5.x?topic=components-tuning-jvm-heap-size

Question 5

Question Type: MultipleChoice

After deploying Content Platform Engine, the GCD section on the FileNet P8 System Health page displays a red icon.

What might this be an indication of?

Options:

A- The bootstrap username and password are defined correctly.

B- The GCD XA and non-XA data sources are undefined.

C- The GCD XA and non-XA data sources have unique names.

D- The GCD contains a domain object.

Answer:

A

Question 6

Question Type: MultipleChoice

Prior to creating a connection to the Fixed Content Device in ACCE, which tool(s) is (are) used to create and configure the fixed content device?

Options:

A- FileNet Deployment Manager

B- Content Navigator

C- FileNet Configuration Manager

D- Tools supplied by the vendor of the fixed content provider

Answer:

D

Question 7

Question Type: MultipleChoice

To verify the deployed build and version displayed on the Content Platform Engine Context Startup Page, which file in the installation directory should be checked?

Options:

A- ce_version.txt

B- ce_startup.txt

C- ce_release.txt

D- ce build.txt

Answer:

A

Explanation:

https://www.ibm.com/docs/en/filenet-p8-platform/5.2.1?topic=engine-verifying-content-platform-deployment

Question 8

Question Type: MultipleChoice

A Content Platform Engine environment is installed and configured in a highly available environment using WebSphere Application Server on application servers named myserverl .com and myserver2.com in a cluster named mycluster using the default HTTP transport port. The environment also includes a load balancer with the virtual server name myloadbalancer.

What is the typical URL used to connect to the Content Platform Engine environment using Content Engine Web Services?

Options:

A- http://myserver2/wsi/FNCEWS40MTOM/

B- http://myloadbalancer/wsi/FNCEWS40MTOM/

C- http://myserver1 /wsi/FNCEWS40MTOIW

D- http://mycluster/wsi/FNCEWS40MTOM/

Answer:

C

Question 9

Question Type: MultipleChoice

When configuring Content Platform Engine, which file indicates that the Configure GCD JDBC Data Sources task completed successfully?

Options:

A- configurejdbcgcd.done

B- configurejdbcgcd.success

C- configurejdbcgcd.good

D- configurejdbcgcd.ok

Answer:

C

Question 10

Question Type: MultipleChoice

Which account can create, modify, and delete Content Platform Engine P8 domain-level resources?

Options:

A- Workflow system administrator

B- Content Platform Engine application server installation administrator

C- GCD Administrator

D- Content Platform Engine Service User

Answer:

B

Question 11

Question Type: MultipleChoice

Which tool is used to change the port on which the IBM Content Search Sen/ices server listens for requests?

Options:

A- dumplndex

B- checklndex

C- adminTool

D- configTool

Answer:

D
