**Answer:**

---

A

## Question 3

---

**Question Type:** MultipleChoice

---

Which collection of key features describes AI Manager?

**Options:**

---

- A- AI data tools and connections and Metric Manager
- B- AI data tools and connections and infrastructure automation
- C- AI models and Chat Ops
- D- Network management and service and topology management

**Answer:**

---

C

## Question 4

---

**Question Type: MultipleChoice**

---

What data is required for the probable cause AI algorithm in AI Manager?

**Options:**

---

- A- Event and log data
- B- Log data only
- C- Event and topological data
- D- Event data only

**Answer:**

---

B

## Question 5

---

**Question Type: MultipleChoice**

---

What are two valid Runbook types in Event Manager?

**Options:**

---

- A- Partial
- B- Semi-automated

- C- Using the Process Agent
- D- Using failover and fail back

**Answer:**

---

B

## Question 7

---

**Question Type:** MultipleChoice

---

What is the result of issuing the following CLI command?

```
oc get installations.orchestrator.aiops.ibm.com -A && oc get aimanager -A
```

**Options:**

---

- A- Verifies the installation status for AI Manager

- B-** Checks cluster readiness for an AI Manager installation
- C-** Connects the installation orchestrator with
- D-** Installs the AI Manager and installation orchestrator

**Answer:**

---

D

## Question 8

---

**Question Type:** MultipleChoice

---

For AI Manager, which type of ChatOps channel surfaces stories?

**Options:**

---

- A-** Reactive
- B-** Proactive
- C-** Public
- D-** Private

**Answer:**

---

A

## Question 9

---

**Question Type:** MultipleChoice

---

When installing AI manager or Event Manager in an air-gapped environment, which registry must the OpenShift cluster be connected to in order to pull images?

**Options:**

---

- A- Docker V2 compatible registry running behind
- B- quay.io
- C- Red Hat OpenShift internal registry
- D- docker.io

**Answer:**

---

C
