Question 1

Question Type: MultipleChoice

CyberArk Identity has created a CLI integration with which vendor?

Options:

- A- Amazon Web Services
- B- Salesforce
- C- Microsoft
- D- Zoom

Answer:

A

Question 2

Question Type: MultipleChoice

A customer's IT admin asks you to disable CyberArk Identity Connector auto-update software options.

Which statement is correct?

Options:

- A- Submit a support ticket to the CyberArk support team and ask them to disable the CyberArk Connector auto-update software remotely
- B- Identity does not allow you to disable the Connector software auto-update.
- C- The Connector software auto-update can be disabled on the CyberArk Identity Connector server under the configuration window.
- D- You can disable the Connector software auto-update on CyberArk Identity SaaS Admin Portal under Settings -> Network -> CyberArk Identity Connectors.

Answer:

C

Question 3

Question Type: DragDrop

Admins can enable self-service for users to unlock their accounts. There are four options under the Admin Portal Core Services > Policies > User Security Policies > Self Service > Account Unlock options.

Match each option to the correct description.

Allow for Active Directory users	Drag answer here	enables users with Active Directory accounts to unlock their accounts
Only allow from browsers with identity cookie	Drag answer here	restricts account unlock to those users who have already logged in successfully
Show a message to end users in desktop login that account is locked	Drag answer here	shows users a message on the desktop login UI that their account is locked
Show a message that explains the account unlock experience to end users who unlock their accounts	Drag answer here	displays this message to users who successfully unlock their accounts: "Your sign in experience was different"
		restricts account unlock to those users who have already failed logon on the browsers
