Question 1

Question Type: MultipleChoice

Which of the following options is not the session mode used by TensorFlow?

Options:

- A- call the session generation function
- B- explicitly, call the session close function
- C- explicitly, manage
- D- through Python context, and multiple POST queries

Answer:

D

Question 2

Question Type: MultipleChoice

The Python language does not allow another loop body to be embedded within a loop.

Options:

A- True

B- False

Answer:

B

Question 3

Question Type: MultipleChoice

According to the constraints, optimization problems can be divided into the following categories?

Options:

- A- equality constraints
- B- inequality constraint
- C- unconstrained condition
- D- semi-constrained condition

Answer:

A, B

Question 4

Question Type: MultipleChoice

What are the application scenarios of break statement in Python language?

Options:

- A- any Python statement
- B- while loop statement
- C- for loop statement

D- nested loop statement

Answer:

B, C, D

Question 5

Question Type: MultipleChoice

What is incorrect about the following description of the distribution function, distribution law, and density function of random variables?

Options:

A- The distribution law can only describe the law of the value of discrete random variables

B- the density function can only describe the value of continuous random variables

C- discrete random variables have no distribution function

D- distribution function describes the law of random variables

Answer:

C

Question 6

Question Type: MultipleChoice

Neural network research belongs to which of the following schools?

Options:

A- symbolism

B- connectionism

C- behaviorism

D- neither

Answer:

C

Question 7

Question Type: MultipleChoice

Which option does the convolutional neural network structure not include?

Options:

- A- convolutional layer
- B- pooling layer
- C- circulation layer
- D- fully connected layer

Answer:

C

Question 8

Question Type: MultipleChoice

The Python dictionary is identified by "{}", and the internal data consists of the key and its corresponding value.

Options:

A- True

B- False

Answer:

A

Question 9

Question Type: MultipleChoice

Deep learning is different from machine learning, there is no unsupervised algorithm.

Options:

A- True

B- False

Answer:

B

Question 10

Question Type: MultipleChoice

As shown in the figure below, which of the following options are the eigenvalues of matrix A?

$$A = \begin{bmatrix} 3 & -1 \\ -1 & 3 \end{bmatrix}$$

Options:

A- 2

B- -2

C- -4

D- 4

Answer:

A, D

Question 11

Question Type: MultipleChoice

What are the regularization in deep learning?

Options:

- A- L1 norm L2 norm
- B- data set enhancement
- C- integration method
- D- Dropout

Answer:

A, C, D

Question 12

Question Type: MultipleChoice

What are the implementation modes of TensorFlow?

Options:

- A- stand-alone mode
- B- distributed mode
- C- reverse mode
- D- Forward mode

Answer:

C, D
