Question 1

Question Type: MultipleChoice

Which IEEE standard provides the highest transmission rates in the 5.0GHz frequency band?

Options:

A- 802.11a

B- 802.11ac

C- 802.11g

D- 802.11n

Answer:

D

Question 2

Question Type: MultipleChoice

A company has an Aruba solution with a guest WLAN named exam_guest. A network administrator creates the guest WLAN with the wizard and does not change any of the default roles. The authentication server does not send particular role assignments for authorized users. The company wants to deny guest access to specific IP ranges after the guests authenticate.

For which role should the administrator create the rule to deny this traffic?

Options:

A- exam_guest-guest-logon

B- authorized

C- guest-logon

D- guest

Answer:

D

Question 3

Question Type: MultipleChoice

A company currently uses 802.11ac Wave 1 as a wireless solution. They want to upgrade to 802.11ac Wave2.

Which new feature will now be available with this upgrade?

Options:

A- band steering

B- multiple spatial streams

C- 40MHz channel bonding

D- multi-user MIMO (MU-MIMO)

Answer:

D

Question 4

Question Type: MultipleChoice

A company has many 7220 controllers in its Aruba wireless architecture. A network administrator wants to use the Traffic Analysis dashboard in order to monitor which type of applications is being used by wireless users.

What is required for this implementation?

Options:

- A- Airmatch and ClientMatch must be enabled.
- B- The solution must have active PEFNG licenses.
- C- Firewall policies must include application filtering rules.
- D- WLANs must use the decrypt-tunnel forwarding option.

Answer:

B

Question 5

Question Type: MultipleChoice

What is one setting that a network administrator can configure for user roles in an Aruba solution?

Options:

- A- DHCP pool
- B- ClientMatch rules
- C- source NAT
- D- Maximum session

Answer:

D

Question 6

Question Type: MultipleChoice

Refer to the exhibit.

Exam_Employee General VLANs Security Access **Profiles**

Profiles for WLAN Exam_Employee

- Wireless LAN
- Virtual AP
- Exam_Employee
 - 802.11K
 - AAA**
 - Anyspot
 - Hotspot 2.0
 - SSID
 - WMM Traffic management

AAA Profile: Exam_Employee

AAA Profile: Exam_Employee

Initial role: logon

Mac Authentication Default Role: guest

802.1X Authentication Default Role: authenticated

Download Role from CPPM:

Set username from dhcp option 12:

L2 Authentication Fall Through:

Multiple Server Accounting:

The exhibit shows the AAA profile for a WLAN on an Aruba solution. This WLAN uses 802.1X to authenticate users to a RADIUS server. A user successfully authenticates with 802.1X, but the RADIUS server does not send a role assignment.

How does the Aruba firewall handle the role assignment for this user?

Options:

- A- It does not assign a role.
- B- It applies the Aruba VSA role employee.
- C- It assigns the logon role.
- D- It assigns the authenticated role.

Answer:

D

Question 7

Question Type: MultipleChoice

A company plans to deploy a Mobility Master (MM) solution with two MM nodes. The MM solution will manage 10 Mobility Controller (MC) appliances that will control a total of 400 APs.

How should the network administrator install the AP licenses?

Options:

- A- 40 AP licenses on the MM and no licenses on the MC

B- 400 AP licenses on the MM and no licenses on the MC

C- 800 AP licenses on each MC and no licenses on the MC

D- 800 AP licenses on the MM and 40 AP licenses on each MC

Answer:

B
