Question 1

Question Type: MultipleChoice

You have been asked to select a number of tools to support the performance testing. Which TWO of the following tools would you recommend? 2 credits [K4]

Options:

- A- Test management tool
- B- Load testing tool
- C- Static analysis tool
- D- Monitoring tool
- E- Test oracle tool

Answer:

B, D

Question 2

Question Type: MultipleChoice

Part 4 "Test tools & Automation"

A project has little structure in testing. You have been asked to create a test set for regression testing for a large legacy application. Manual testing will extend the current delivery deadline. The present situation presents an opportunity to introduce a test execution tool to the organisation. The IT Director believes that as a result future testing will be done by a smaller team, making maximum use of the tool to optimize efficiency.

It has been decided to improve the efficiency and effectiveness of unit testing by acquiring a number of test tools. Which TWO of the following tools would you select to support unit testing? 1 credit [K2]

Options:

- A- Dynamic analysis
- B- Review tool
- C- Coverage measurement tool
- D- Monitoring
- E- Test management

Answer:

A, C

Question 3

Question Type: MultipleChoice

A new web site has been launched for a conference organisation. There are a number of links to other related websites for information purposes. Customers like the new site but complaints are being made that some (not all) of the links to other sites do not work. 1 credit [K2]

Options:

- A- Performance tool
- B- Hyperlink tool
- C- Usability testing tool
- D- Static analysis tool

Answer:

B

Question 4

Question Type: MultipleChoice

For the control flow, what is the correct labelling? 1 credit [K2]

i ii iii

Options:

- A- NodesLinkRegion
- B- NodesRegionLink
- C- RegionLinkNodes
- D- RegionNodesLink

Answer:

A

Question 5

Question Type: MultipleChoice

Consider the following code fragment

```
If (a>b) and (b>c) then
```

```
  b = (a+c)/2
```

```
endif
```

Assume that in the following options, each of the three numbers in parenthesis represent the inputs for a test case, where the first number represents variable "a", the second number represents variable "b", and the third number represents variable "c". Which of the following gives a set of test case inputs that achieves 100% decision coverage for this fragment of code with the minimum number of test cases? 2 credits [K3]

Options:

A- (5, 3, 2)

B- (5, 3, 2); (5, 4, 0)

C- (5, 4, 0); (4, 5, 0)

D- (4, 5, 0); (5, 4, 5)

Answer:

C

Question 6

Question Type: MultipleChoice

Which specification-based technique could be used to enhance coverage for this code fragment? 1 credit [K2]

Options:

- A- Boundary value analysis
- B- Exploratory testing
- C- State transition testing
- D- Use case testing

Answer:

A

Question 7

Question Type: MultipleChoice

The comment frequency of the code fragment is 13%. To which ISO 9126 quality attribute does a good level of comment frequency especially contribute? 1 credit [K2]

Options:

A- Portability

B- Maintainability

C- Usability

D- Efficiency

Answer:

A

Question 8

Question Type: MultipleChoice

What is the number of nested levels for the code fragment? 2 credits [K3]

Options:

A- 0

B- 1

C- 2

D- 3

Answer:

C

Question 9

Question Type: MultipleChoice

How many test cases would be needed to achieve 100% statement coverage? 1 credit [K2]

Options:

A- 1

B- 2

C- 3

D- 4

Answer:

A

Question 10

Question Type: MultipleChoice

The developers have suggested test set A is adequate to test the program opposite:

Test Set A		
Test Case 1	Test case 2	Test case 3
Price = 0.1	Price = 2.0	Price = 10.0
Quantity = 1000	Quantity = 500	Quantity = 120
Bonus = 9	Bonus = 1	Bonus = 3
Market = "USA"	Market = "UK"	Market = "FRA"

When executing test set A through the program which statements are exercised? 2 credits [K3]

Options:

- A- All
- B- All, but statement 22
- C- All, but statement 27, 28 and 29
- D- All, but statement 22, 27, 28 and 29

Answer:

D
