## Question 1

---

**Question Type:** MultipleChoice

---

In an SD-WAN deployment, what allows customers to modify resources in an automated fashion instead of logging on to a central controller or using command-line interface (CLI) to manage all their configurations?

### Options:

---

- A- dynamic user group (DUG)
- B- DNS server
- C- application programming interface (API)
- D- WildFire

### Answer:

---

A

## Question 2

---

**Question Type:** MultipleChoice

---

What is a benefit of a cloud-based secure access service edge (SASE) infrastructure over a Zero Trust Network Access (ZTNA) product based on a software-defined perimeter (SDP) model?

**Options:**

---

- A-** Users, devices, and apps are identified no matter where they connect from.
- B-** Connection to physical SD-WAN hubs in their locations provides increased interconnectivity between branch offices.
- C-** Complexity of connecting to a gateway is increased, providing additional protection.
- D-** Virtual private network (VPN) services are used for remote access to the internal data center, but not the cloud.

**Answer:**

---

A

## Question 3

---

**Question Type:** MultipleChoice

---

What allows enforcement of policies based on business intent, enables dynamic path selection, and provides visibility into performance and availability for applications and networks?

**Options:**

---

- A- Identity Access Management (IAM) methods
- B- Firewall as a Service (FWaaS)
- C- Instant-On Network (ION) devices
- D- Cloud Access Security Broker (CASB)

**Answer:**

---

B

## Question 4

---

**Question Type: MultipleChoice**

---

Which product allows advanced Layer 7 inspection, access control, threat detection and prevention?

**Options:**

---

- A- Infrastructure as a Service (IaaS)

- B- remote browser isolation
- C- network sandbox
- D- Firewall as a Service (FWaaS)

**Answer:**

---

D

## Question 5

---

**Question Type:** MultipleChoice

---

What is a disadvantage of proxy secure access service edge (SASE) when compared to an inline SASE solution?

**Options:**

---

- A- Proxies force policy actions to be treated as business decisions instead of compromises due to technical limitations.
- B- Teams added additional tools to web proxies that promised to solve point problems, resulting in a fragmented and ineffective security architecture.
- C- Proxy solutions require an unprecedented level of interconnectivity.
- D- Exclusive use of web proxies leads to significant blind spots in traffic and an inability to identify applications and threats on non-

standard ports or across multiple protocols.

**Answer:**

---

D

## Question 6

---

**Question Type:** MultipleChoice

---

In which step of the Five-Step Methodology for implementing the Zero Trust model is the Kipling Method relevant?

**Options:**

---

- A- Step 3: Architect a Zero Trust network
- B- Step 5: Monitor and maintain the network
- C- Step 4: Create the Zero Trust policy
- D- Step 2: Map the transaction flows

**Answer:**

---

C

## Question 7

---

**Question Type:** MultipleChoice

---

Which type of access allows unmanaged endpoints to access secured on-premises applications?

**Options:**

---

**A-** manual external gateway

**B-** secure web gateway (SWG)

**C-** GlobalProtect VPN for remote access

**D-** Prisma Access Clientless VPN

**Answer:**

---

D

## Question 8

---

**Question Type: MultipleChoice**

---

What happens when SaaS Security sees a new or unknown SaaS application?

**Options:**

---

- A-** It forwards the application for WildFire analysis.
- B-** It uses machine learning (ML) to classify the application.
- C-** It generates alerts regarding changes in performance.
- D-** It extends the branch perimeter to the closest node with high performance.

**Answer:**

---

A

## Question 9

---

**Question Type: MultipleChoice**

---

How does the secure access service edge (SASE) security model provide cost savings to organizations?

**Options:**

---

- A- The single platform reduces costs compared to buying and managing multiple point products.
- B- The compact size of the components involved reduces overhead costs, as less physical space is needed.
- C- The content inspection integration allows third-party assessment, which reduces the cost of contract services.
- D- The increased complexity of the model over previous products reduces IT team staffing costs.

**Answer:**

---

C

## Question 10

---

**Question Type: MultipleChoice**

---

In which step of the Five-Step Methodology for implementing the Zero Trust model are the services most valuable to the company defined?

**Options:**

---

- A- Step 2: Map the transaction flows

- B- Step 4: Create the Zero Trust policy
- C- Step 5: Monitor and maintain the network
- D- Step 1: Define the protect surface

**Answer:**

---

D

## Question 11

---

**Question Type:** MultipleChoice

---

The Cortex Data Lake sizing calculator for Prisma Access requires which three values as inputs? (Choose three.)

**Options:**

---

- A- throughput of remote networks purchased
- B- cloud-managed or Panorama-managed deployment
- C- retention period for the logs to be stored
- D- number of log-forwarding destinations

**E-** number of mobile users purchased

**Answer:**

---

A, C, E
