C- restricted to predefined categories

Answer:

B

Question 2

You need to connect to an Azure virtual machine by using Azure Bastion. What should you use?

Options:

A- an SSH client

B- PowerShell remoting

C- the Azure portal

D- the Remote Desktop Connection client

Answer:

D

Question 3

Question Type: MultipleChoice

Which service includes the Attack simul-ation training feature?

Options:

A- Microsoft Defender for Cloud Apps

B- Microsoft Defender for Office 365

C- Microsoft Defender for Identity

D- Microsoft Defender for SQL

Answer:

B

Question 4

Question Type: **MultipleChoice**

Which two cards are available in the Microsoft 365 Defender portal? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

Options:

A- Users at risk

B- Compliance Score

C- Devices at risk

D- Service Health

E- User Management

Answer:

B, C

Question 5

Question Type: MultipleChoice

Microsoft 365 Endpoint data loss prevention (Endpoint DLP) can be used on which operating systems?

Options:

A- Windows 10 and iOS only

B- Windows 10 and Android only

C- Windows 10, Android, and iOS

D- Windows 10 only

Answer:

A

Question 6

Question Type: MultipleChoice

What should you use to ensure that the members of an Azure Active Directory group use multi-factor authentication (MFA) when they sign in?

Options:

A- Azure Active Directory (Azure AD) Identity Protection

B- a conditional access policy

C- Azure role-based access control (Azure RBAC)

D- Azure Active Directory (Azure AD) Privileged Identity Management (PIM)

Answer:

B

Explanation:

The recommended way to enable and use Azure AD Multi-Factor Authentication is with Conditional Access policies. Conditional Access lets you create and define policies that react to sign-in events and that request additional actions before a user is granted access to an application or service.

Question 7

Question Type: **MultipleChoice**

Which compliance feature should you use to identify documents that are employee resumes?

Options:
