Question 1

Question Type: MultipleChoice

Which of the following commands adds a static IPv6 address to the network interface eth0?

Options:

- A- ip add addr 2001:db8::1337/64 dev eth0
- B- ip -6 add addr 2001:db8::1337/64 dev eth0
- C- ip addr add 2001:db8::1337/64 dev eth0
- D- ip -6 addr add new 2001:db8::1337/64 dev eth0
- E- ip addr add -6 2001:db8::1337/64 dev eth0

Answer:

D

Question 2

Question Type: MultipleChoice

Which of the filter keywords below could be used in the following command:

tcpdump --i eth0 _____ 203.0.113.8 (Choose three.)

Options:

A- host

B- ip

C- src

D- dst

E- ipv6

Answer:

A, C, D

Question 3

Question Type: MultipleChoice

Which of the following configuration files are used by tcpwrapper?

Options:

- A- /etc/tcpd.allow and etc/tcpd.deny
- B- /etc/tcpwrapper.allow and /etc/tcpwrapper.deny
- C- /etc/hosts.allow and /etc/hosts.deny
- D- /etc/service.allow and /etc/service.deny

Answer:

C

Question 4

Question Type: MultipleChoice

A web application server contains 64GB of RAM and two swap partitions on normal hard disk drives, each with a size of 64 GB. Within the last month, the average number of user sessions on this server has grown by 20 percent. At the same time, the average usage of RAM increased from 65 to 75 percent, while the swap space is almost not used at all. It is expected that the number of user sessions will continue to increase by about 15 to 20 percent each month. Which of the following reactions would be appropriate in response to these observations? (Choose two.)

Options:

- A- Delay any hardware upgrade until there is a significant consumption of swap space to ensure an efficient usage of the available hardware
- B- Create a RAID 1 device on the two swap partitions to avoid data loss in case swap space has to be used in the future
- C- Consider the installation of an additional application server to distribute the load if the expected growth continues over several months
- D- Move the web application's scripts and content a ram disk in order to ensure fast access and to avoid the need for swap space
- E- Update the hardware to increase the amount of available RAM to avoid using swap space

Answer:

C, E

Question 5

Question Type: MultipleChoice

After the downloading patch-4.6.4.xz from <http://kernel.org>, what are the next steps to prepare the build of a version 4.6.4 Linux kernel?
(Choose two.)

Options:

- A- Uncompress the file and move the resulting directory to /usr/src/linux
- B- Apply the patch file to the kernel source directory containing kernel version 4.6.0
- C- Apply the patch file to the kernel source directory containing kernel version 4.6.3
- D- Uncompress the file using xz to get the uncompressed patch file
- E- Use patch to apply the uncompressed patch file to the source directory of any previous kernel version

Answer:

D, E

Question 6

Question Type: MultipleChoice

In which directory tree are files modified when changing kernel parameters using the command sysctl?

Options:

- A- /sys/kernel/
- B- /proc/kernel/

C- /proc/sys/

D- /lib/sys/

E- /sys/proc/

Answer:

C

Question 7

Question Type: MultipleChoice

Which of the following is a userspace application used to modify EFI entries on a Linux system?

Options:

A- efieditor

B- configefi

C- efimanager

D- efibootmgr

E- efibootedit

Answer:

D

Question 8

Question Type: MultipleChoice

What is the purpose of an initramfs during the Linux system start?

Options:

- A- It loads required modules and starts sub systems like LVM to make the root file system accessible to the kernel
- B- It moves the kernel from normal system memory to initram memory to speed up kernel access
- C- It copies the root file system's content to RAM to speed up the system and reduce writes to disk
- D- It creates a ram disk to store volatile data for directories like /tmp to reduce writes to disk

Answer:

A
