Question 1

DataWorks provides powerful scheduling capabilities including time-based or dependency-based

task trigger mechanisms to perform tens of millions of tasks accurately and punctually each day based

on DAG relationships. It supports multiple scheduling frequency configurations like: (Number of correct

answers: 4)

Score 2

Options:

A- By Minute

B- By Hour

C- By Day

D- By Week

E- By Second

Answer:

A, B, C, D

Question 2

Question Type: MultipleChoice

The data development mode in DataWorks has been upgraded to the three-level structure

comprising of _____, _____, and _____. (Number of correct answers: 3)

Score 2

Options:

A- Project

B- Solution

C- Business flow

D- Directory

Answer:

A, B, D

Question 3

DataWorks can be used to develop and configure data sync tasks. Which of the following statements

are correct? (Number of correct answers: 3)

Score 2

Options:

A- The data source configuration in the project management is required to add data source

B- Some of the columns in source tables can be extracted to create a mapping relationship between fields, and constants or variables can't be added

C- For the extraction of source data, 'where' filtering clause can be referenced as the criteria of incremental synchronization

D- Clean-up rules can be set to clear or preserve existing data before data write

Answer:

A, B, D

Question 4

A company originally handled the local data services through the Java programs. The local data have

been migrated to MaxCompute on the cloud, now the data can be accessed through modifying the Java

code and using the Java APIs provided by MaxCompute.

Score 1

Options:

A- True

B- False

Answer:

A

Question 5

In MaxCompute, if error occurs in Tunnel transmission due to network or Tunnel service, the user

can resume the last update operation through the command

tunnel resume;.

Score 1

Options:

A- True

B- False

Answer:

A

Question 6

Assume that Task 1 is configured to run at 02:00 each day. In this case, the scheduling system

automatically generates a snapshot at the time predefined by the periodic node task at 23:30 each day.

That is, the instance of Task 1 will run at 02:00 the next day. If the system detects the upstream task is

complete, the system automatically runs the Task 1 instance at 02:00 the next day.

Score 1

Options:

A- True

B- False

Answer:

A

Question 7

Project is an important concept in MaxCompute. A user can create multiple projects, and each object

belongs to a certain project.

Score 1

Options:

A- True

B- False

Answer:

A

Question 8

Question Type: **MultipleChoice**

In DataWorks table permission system, you can revoke permissions only on the fields whose security level is higher than the security
level of your account.

Score 1

Options:

A- True

B- False

Answer:

A

Question 9

Question Type: MultipleChoice

JindoFS in E-MapReduce provided by SmartData uses OSS as the storage back end.

Score 1

Options:

A- True

B- False

Answer:

A

Question 10

Question Type: MultipleChoice

An enterprise uses Alibaba Cloud MaxCompute for storage of service orders, system logs and

management data. Because the security levels for the data are different, it is needed to register multiple

Alibaba Cloud accounts for data management.

Score 1

Options:

A- True

B- False

Answer:

B

Question 11

Question Type: **MultipleChoice**

Alibaba Cloud Elastic MapReduce (E-MapReduce) is a big data processing solution to quickly process

huge amounts of dat

a. Based on open source Apache Hadoop and Apache Spark, E-MapReduce flexibly

manages your big data use cases such as trend analysis, data warehousing, and analysis of continuously

streaming data.

Score 1

Options:

A- True

B- False

Answer:

A

Question 12

Question Type: MultipleChoice

In each release of E-MapReduce, the software and software version are flexible. You can select

multiple software versions.

Score 1

Options:

A- True

B- False

Answer:

B
