Question 1

Question Type: MultipleChoice

Query parsing and compilation occurs in which architecture layer of the Snowflake Cloud Data Platform?

Options:

A- Cloud services layer

B- Compute layer

C- Storage layer

D- Cloud agnostic layer

Answer:

B

Question 2

Question Type: MultipleChoice

Which database objects can be shared with the Snowflake secure data sharing feature? (Choose two.)

Options:

A- Files

B- External tables

C- Secure User-Defined Functions (UDFs)

D- Sequences

E- Streams

Answer:

B, C

Question 3

Question Type: **MultipleChoice**

Which statements reflect key functionalities of a Snowflake Data Exchange? (Choose two.)

Options:

A- If an account is enrolled with a Data Exchange, it will lose its access to the Snowflake Marketplace.

B- A Data Exchange allows groups of accounts to share data privately among the accounts.

C- A Data Exchange allows accounts to share data with third, non-Snowflake parties.

D- Data Exchange functionality is available by default in accounts using the Enterprise edition or higher.

E- The sharing of data in a Data Exchange is bidirectional. An account can be a provider for some datasets and a consumer for others.

Answer:

B

Question 4

Question Type: MultipleChoice

A Snowflake user executed a query and received the results. Another user executed the same query 4 hours later. The data had not changed.

What will occur?

Options:

A- No virtual warehouse will be used, data will be read from the result cache.

B- No virtual warehouse will be used, data will be read from the local disk cache.

C- The default virtual warehouse will be used to read all data.

D- The virtual warehouse that is defined at the session level will be used to read all data.

Answer:

A

Question 5

Question Type: **MultipleChoice**

Which feature allows a user the ability to control the organization of data in a micro-partition?

Options:

A- Range Partitioning

B- Search Optimization Service

C- Automatic Clustering

D- Horizontal Partitioning

Answer:

D

Question 6

Question Type: **MultipleChoice**

What is the MINIMUM Snowflake edition required to use the periodic rekeying of micro-partitions?

Options:

A- Enterprise

B- Business Critical

C- Standard

D- Virtual Private Snowflake

Answer:

B

Question 7

Question Type: MultipleChoice

If a Snowflake user decides a table should be clustered, what should be used as the cluster key?

Options:

A- The columns that are queried in the select clause.

B- The columns with very high cardinality.

C- The columns with many different values.

D- The columns most actively used in the select filters.

Answer:

D

Question 8

Question Type: MultipleChoice

A company needs to read multiple terabytes of data for an initial load as part of a Snowflake migration. The company can control the number and size of CSV extract files.

How does Snowflake recommend maximizing the load performance?

Options:

A- Use auto-ingest Snowpipes to load large files in a serverless model.

B- Produce the largest files possible, reducing the overall number of files to process.

C- Produce a larger number of smaller files and process the ingestion with size Small virtual warehouses.

D- Use an external tool to issue batched row-by-row inserts within BEGIN TRANSACTION and COMMIT commands.

Answer:

B

Question 9

Question Type: MultipleChoice

For non-materialized views, what column in Information Schema and Account Usage identifies whether a view is secure or not?

Options:

A- CHECK_OPTION

B- IS_SECURE

C- IS_UPDATEABLE

D- TABLE_NAME

Answer:

B
