Question Type: MultipleChoice

How can a row access policy be applied to a table or a view? (Choose two.)

Options:

- A- Within the policy DDL
- B- Within the create table or create view DDL
- C- By future APPLY for all objects in a schema
- D- Within a control table
- E- Using the command ALTER <object> ADD ROW ACCESS POLICY ;

Answer:

B, D

Question 2

Question Type: MultipleChoice

The Snowflake Search Optimization Services supports improved performance of which kind of query?

Options:

- A- Queries against large tables where frequent DML occurs
- B- Queries against tables larger than 1 TB
- C- Selective point lookup queries
- D- Queries against a subset of columns in a table

Answer:

C

Explanation:

%20point,OBJECT%2C%20and%20ARRAY%20columns)

Question 3

Question Type: MultipleChoice

A user created a transient table and made several changes to it over the course of several days. Three days after the table was created, the user would like to go back to the first version of the table.

How can this be accomplished?

Options:

- A- Use Time Travel, as long as DATA_RETENTION_TIME_IN_DAYS was set to at least 3 days.
- B- The transient table version cannot be retrieved after 24 hours.
- C- Contact Snowflake Support to have the data retrieved from Fail-safe storage.
- D- Use the FAIL_SAFE parameter for Time Travel to retrieve the data from Fail-safe storage.

Answer:

B

Question 4

Question Type: MultipleChoice

The following JSON is stored in a VARIANT column called src of the CAR_SALES table:

A user needs to extract the dealership information from the JSON.

How can this be accomplished?

Options:

- A- select src:dealership from car_sales;
- B- select src.dealership from car_sales;
- C- select src:Dealership from car_sales;
- D- select dealership from car_sales;

Answer:

A

Question 5

Question Type: MultipleChoice

Which query profile statistics help determine if efficient pruning is occurring? (Choose two.)

Options:

- A- Bytes sent over network
- B- Percentage scanned from cache
- C- Partitions total
- D- Bytes spilled to local storage
- E- Partitions scanned

Answer:

B, E

Question 6

Question Type: MultipleChoice

What privilege should a user be granted to change permissions for new objects in a managed access schema?

Options:

- A- Grant the OWNERSHIP privilege on the schema.
- B- Grant the OWNERSHIP privilege on the database.
- C- Grant the MANAGE GRANTS global privilege.
- D- Grant ALL privileges on the schema.

Answer:

C

Question 7

Question Type: MultipleChoice

A data provider wants to share data with a consumer who does not have a Snowflake account. The provider creates a reader account for the consumer following these steps:

1. Created a user called "CONSUMER"
2. Created a database to hold the share and an extra-small warehouse to query the data
3. Granted the role PUBLIC the following privileges: Usage on the warehouse, database, and schema, and SELECT on all the objects in the share

Based on this configuration what is true of the reader account?

Options:

- A- The reader account will automatically use the Standard edition of Snowflake.
- B- The reader account compute will be billed to the provider account.
- C- The reader account can clone data the provider has shared, but cannot re-share it.
- D- The reader account can create a copy of the shared data using CREATE TABLE AS...

Answer:

C

Question 8

Question Type: MultipleChoice

Files have been uploaded to a Snowflake internal stage. The files now need to be deleted.

Which SQL command should be used to delete the files?

Options:

- A- PURGE
- B- MODIFY
- C- REMOVE
- D- DELETE

Answer:

D

Question 9

Question Type: MultipleChoice

What effect does WAIT_FOR_COMPLETION = TRUE have when running an ALTER WAREHOUSE command and changing the warehouse size?

Options:

- A- The warehouse size does not change until all queries currently running in the warehouse have completed.
- B- The warehouse size does not change until all queries currently in the warehouse queue have completed.
- C- The warehouse size does not change until the warehouse is suspended and restarted.
- D- It does not return from the command until the warehouse has finished changing its size.

Answer:

D
