# Question 1

---

## Question Type: MultipleChoice

---

Executive management approved the storage of sensitive data on smartphones and tablets as long as they were encrypted. Later a vulnerability was announced at an information security conference that allowed attackers to bypass the device's authentication process, making the data accessible. The smartphone manufacturer said it would take six months for the vulnerability to be fixed and distributed through the cellular carriers. Four months after the vulnerability was announced, an employee lost his tablet and the sensitive information became public.

What was the failure that led to the information being lost?

### Options:

---

- A- There was no risk acceptance review after the risk changed
- B- The employees failed to maintain their devices at the most current software version
- C- Vulnerability scans were not done to identify the devices that we at risk
- D- Management had not insured against the possibility of the information being lost

### Answer:

---

A

### Answer:

---

A

## Question 3

---

**Question Type: MultipleChoice**

---

Which of the following actions produced the output seen below?

```
C3PO:Documents student$ diff firewallrules.txt firewallrules2.txt  
  
< access-list inbound permit tcp 8.8.0.0 0.0.0.255 10.10.12.252 eq 8080  
---  
> access-list inbound permit tcp 8.8.0.0 0.0.0.255 10.10.12.252 eq 8080  
> access-list inbound permit tcp host 209.7.159.53 any 3389
```

**Options:**

---

- A- An access rule was removed from firewallrules.txt
- B- An access rule was added to firewallrules2.txt
- C- An access rule was added to firewallrules.txt
- D- An access rule was removed from firewallrules2.txt

**Answer:**

---

B

## Question 4

---

**Question Type: MultipleChoice**

---
