---

D

## Question 2

---

**Question Type:** MultipleChoice

---

Which of the following options is not a communication electronic evidence?

**Options:**

---

- A- Telephone recording
- B- Chat history
- C- Email
- D- System log

**Answer:**

---

A

## Question 3

---

**Question Type: MultipleChoice**

---

Which of the following options is not a private network IP address?

**Options:**

---

A- 192.168.254.254/16

B- 172.32.1.1/24

C- 10.32.254.254/24

D- 10.10.10.10/8

**Answer:**

---

B

## Question 4

---

**Question Type: MultipleChoice**

---

The IDS is usually installed on the switch to detect intrusion, and at the same time, it can avoid the single point of failure affecting the normal operation of the network.

**Options:**

---

A- True

**B-** False

**Answer:**

---

A

## Question 5

---

**Question Type:** MultipleChoice

---

Regarding the single sign-on supported by the firewall, which one of the following is not included?

**Options:**

---

**A-** RADIUS.Single sign-on

**B-** ISM single sign-on

**C-** AD single sign-on

**D-** HWTACACS single sign-on

**Answer:**

---

D

## Question 6

---

**Question Type:** MultipleChoice

---

When an access user uses Client-InitiatedVPN to establish a tunnel with the LNS, how many PPP connections can a tunnel carry?

**Options:**

---

A- 3

B- 1

C- 2

D- 4

**Answer:**

---

B

## Question 7

---

**Question Type: MultipleChoice**

---

The key used by DES encryption is bits, while the key used by 3DES encryption is bits.

**Options:**

---

A- 56168

B- 64168

C- 64128

D- 56128

**Answer:**

---

D

## Question 8

---

**Question Type: MultipleChoice**

---

Information security prevention technologies include: data encryption, identity authentication, intrusion prevention and anti-virus, etc.

**Options:**

---

A- True

B- False

**Answer:**

---

A

## Question 9

---

**Question Type: MultipleChoice**

---

**Options:**

---

**A-** Portali certification

**B-** Certification-free

**C-** WeChat authentication

**D-** not certified

**Answer:**

---

D

## Question 11

---

**Question Type:** MultipleChoice

---

Regarding the ServerMap table generated by NAT No-PAT, which of the following descriptions is correct

### Options:

---

- A-** The function of the Server Map generated by NAT No-PAT is equivalent to the security policy. That is, the packets matching the Server Map table can pass through the firewall directly without matching the security policy.
- B-** There are two Server Maps generated by NAT No-PAT by default. One is a reverse Server Map table, which is mainly used for address translation without additional configuration of NAT and security policies when external network users actively access the private network users. to access.
- C-** The Server Map generated by NAT No-PAT is static, that is, after NAT No-PAT is configured, the Server Map table is automatically generated and exists permanently.
- D-** There are two Server Maps generated by NAT No-PAT by default, one is a forward Server Map table

### Answer:

---

C
