Question 1

Question Type: MultipleChoice

What Event Coordination option must be implemented in the Collector node so that message collections are propagated in the order they have been completed?

Options:

- A- All complete collections
- B- First complete collection
- C- Disabled
- D- FIFO

Answer:

A

Question 2

Question Type: MultipleChoice

What is the purpose of an Integration Node?

Options:

- A-** It is a parent process which is responsible for looking after one or more associated runtime processes.
- B-** It is a collection of processes to manage state of the deployed applications and libraries.
- C-** It provides a specific mode of operation or the availability of an additional product, such as a database.
- D-** It provides an isolated runtime environment for a set of deployed message flows and resources.

Answer:

D

Question 3

Question Type: MultipleChoice

How can static library LIB1 be converted into a shared library without breaking references?

Options:

- A-** Use the shared library conversion tool from the Integration Toolkit
- B-** Highlight the static library, open convert wizard create a new shared library selecting the resolve references checkbox which will update all applications, libraries, and independent resources that referenced LIB1.
- C-** Create a new shared library named TMP1, move all assets from static library, rename the static library, and rename shared library LIB1.
- D-** Export static library LIB1 as a shared library, import new shared library into the workspace replacing static library with new shared LIB1.

Answer:

D

Question 4

Question Type: MultipleChoice

What are two nodes that require IBM MQ to be installed on the same machine as IBM App Connect Enterprise?

Options:

- A- GroupGather
- B- FlowOrder
- C- Collector
- D- Route
- E- Resequence

Answer:

C, E

Explanation:

https://www.ibm.com/support/knowledgecenter/SSTTDS_11.0.0/com.ibm.etools.mft.doc/bb28660_.html

Question 5

Question Type: MultipleChoice

Which statement is true regarding the RESTAsyncResponse node?

Options:

- A- It can be in a different integration node as the RESTAsyncRequest node
- B- It has to be in the same integration server as the RESTAsyncRequest node
- C- It can be in a separate integration server than the RESTAsyncRequest node
- D- It has to be in the same flow as the RESTAsyncRequest node

Answer:

D

Question 6

Question Type: MultipleChoice

An Integration Project can contain which two resource types?

Options:

A- Integration Service

B- Message Flows

C- Shared Libraries

D- RestAPIs

E- Message Maps

Answer:

B, E

Explanation:

https://www.ibm.com/support/knowledgecenter/SSMKHH_9.0.0/com.ibm.etools.mft.doc/bc23260_.htm

Question 7

Question Type: MultipleChoice

What are two methods for configuring a Highly Available IBM App Connect Enterprise installation?

Options:

- A- A Microsoft Cluster Server
- B- Multi-instance integration nodes with IBM MQ
- C- Network deployment mode
- D- Integration node clustering
- E- High Availability mode

Answer:

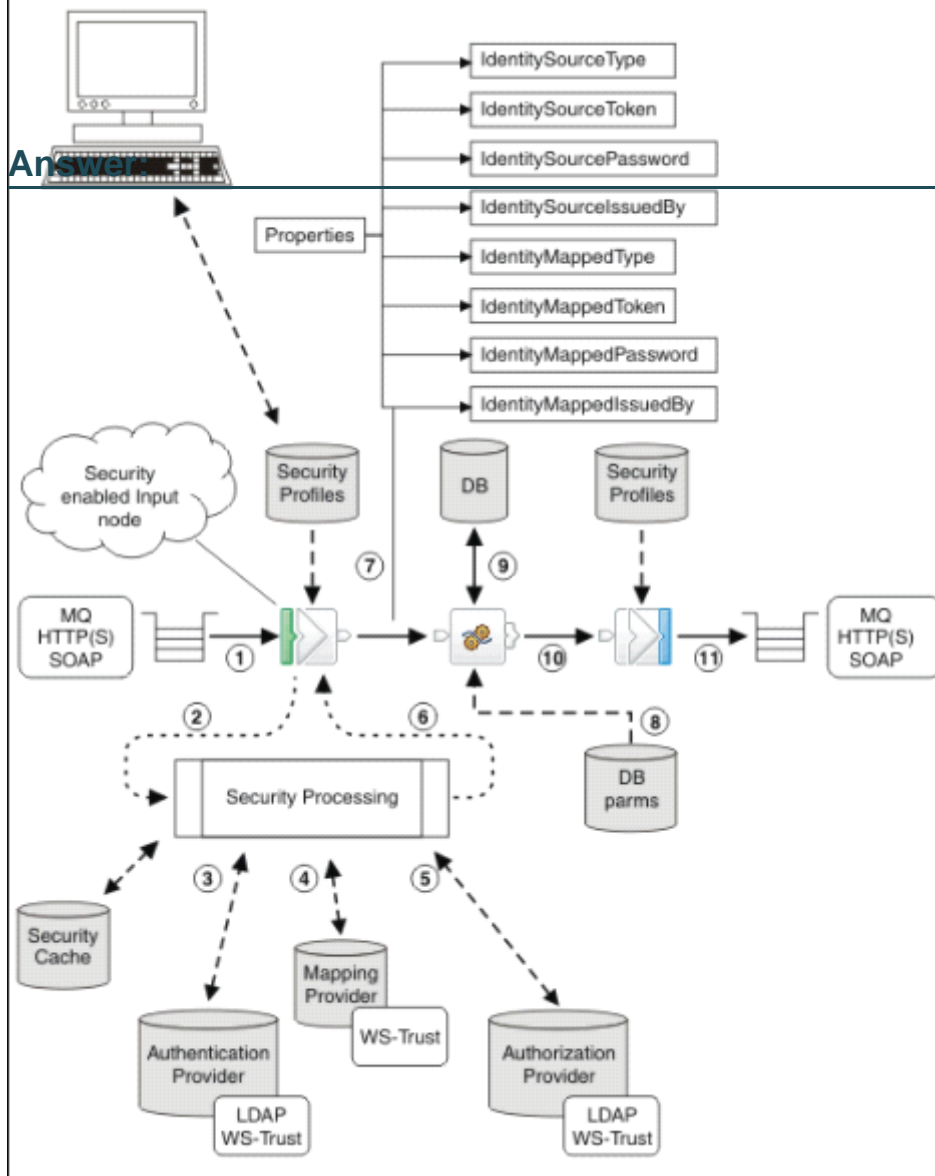

A, E

Question 8

Question Type: Hotspot

The message flow security manager can be invoked by configuring a security enabled input node. The following diagram shows an example message flow and gives an overview of the sequence of events that occur when an input message is received by a security enabled input node in the message flow. Select the number that would interact with LDAP.
